Client Meeting
Thursday December 10th, 2015
- Did a demo of the finished product for Sprint 2
- Client verified each user story

Client Meeting
Thursday December 3rd, 2015
- Discussed layout of Firefighter paged was sufficient for now, but changes could be made in future sprints
  - A button to display all of the information for each firefighter
- Discussed layout of Firetruck paged was sufficient for now, but changes could be made in future sprints
  - Move the "show" button to the right side of the screen
- We now have specific numbers for the capacity of each truck
  - 5 for utility
  - 7 for rescue, ladder, and engine
- Discussed layout and functionality of what happens when a call comes in
  - Be able to take firefighters off the truck
  - Possibly have one page to remove firefighters, select timestamps for the call, and display all of the necessary information for the call

Client Meeting
Thursday November 19th, 2015

- We decided to take on the following user stories for Sprint 2:
  - As a fire officer I want to see the credentials of each fireman so that I can balance the firetrucks correctly.
  - As a fire officer I want to be able to select a fireman and which truck I want to put said fireman on so that we can quickly respond to the call.
  - As a fire officer, I want to see call information on the screen so that I can accurately respond to the call.
- Right now the call information just needs to be static
- In the future, the call information will be updated dynamically - a fire officer will be able to use a different screen to input call information
- What to display in the call information box:
  - Location
  - Type of Call
  - Who else has already responded (police, etc.)
- We have taken on 11 story points (the same as last sprint)

- We will meet again after Thanksgiving break to discuss progress

Client Meeting
Friday November 13th, 2015

- What went well in Sprint 1:
  - Functionality of application was what client wanted
- What can be improved on:
  - Nothing right now from the client's point of view
- SPRINT 2:
  - Ability to assign firefighters to trucks
  - Call location and type of call displayed on the screen
  - One screen that incorporates both of these things
- We will meet again at the regular time (Friday at 10:10) to discuss progress
  - Had to change meeting time to 3:15 on Thursday
