<div align="center">

Client Meeting Notes

11/30/2010

Members in Attendance: Kurt, Becca, and Dan

Time: 2:30-3:00

</div>

Mockups:
- "Software Engineering 2" should be changed to "Software Engineering II"
- Mouse-over for each link in the menu that gives a description of what the link does
- Results Page – for next time, have ones that show what will come up; doesn't have to be real, just functional (picture of team member, etc.)
- Designate links in the requirements
- Favicon – the one the client has already is 16x16 and if we like it, we can use that one or create a revised version of his
- Calendar – menu will be stable, calendar will scroll and will take you to current date; should be a fixed width of ≈ 1000

Next meeting – Have more of a description of what's going to be on the results page

Next semester – Play around with scrollable screens; standard html can do this
