

## Client Meeting #5 Notes

Thursday 9/30/10

### **Changing the usage case narratives**

#### General Notes-

Change Faculty to recommenders

Change User Case Narratives to Usage Case Narratives

Change Client to Course Instructor

Change students to students enrolled in Software Engineering

#### Student-

Change order-put easy navigation first then search.

Will also be able to navigate to team website as well as search

#### Future Employers-

Make sure that perm\_teamname goes to that team's site.

State what the information page is again instead of referring to faculty.

#### Alumni-

May not remember team name or teammates' names. Site can assist them in remembering.

If interviewed by an alumni they can go back and look at the interviewer's experience of software engineering.

### **Looking ahead-**

Client wants a screen shot of the info screen for after a search.

Menu mock up- just a general design of the menu.

Client also wants a page of only demos. This can assist faculty in showing what we do as CS majors.

### **Clients Availability-**

MWF- available after class until 12:30 (note: MW has office hours until 1230 so he may be interrupted)

TR-930-1, 230-430
