Client Meeting
November 15, 2013
3:00-3:30
Software Library
Attendance: Luke Greiner, Denis Kalic, Abigail McCarthy, Pat White, D. Lim

Data Flow Diagrams:
- Submit Assignment
    - Create assignment
        - Can be created but unused
        - must be deployed, before students can see it
    - Organize
        - Hidden/not hidden test cases should be expanded further into level four
- Question Pool
    - Reassign
        - Personal Faculty Pools should only be affiliated with one faculty, not reassigned
        - Course Pools are persistent and do not get reassigned
    - Tag
        - Switch to category
    - Administrators have the ability to move questions from one course pool to another

Compiler:
- Add session id to ensure uniqueness

Prototypes:
- Speak with Dr. Breimer further on login security and the best practices for security questions and forgot question functionality
- Incorporate table into full grade book
- Course Coordinators do ont have a private pool, other their faculty do
