

Client Meeting

November 1, 2013

3:00-3:45

Software Lab

In Attendance: Luke Greiner, Abigail McCarthy, Dr. Darren Lim

Has A Relationship:

- Go through Use Case and to make sure all includes/excludes relationships are accurate relationships
 - ie) Does a faculty member have to create an assignment in order to create a question?
- Choose is used a lot in the Use Case, review cases where it is used
- Choosing assignments is separate from choosing a course,

Passwords should be generated with a random generator

Administrators

- Ability to disable a question so that it cannot be used
- Do not delete users accounts

Preliminary Design:

Level 2 Diagrams

- More in-depth descriptions of processes
- All key processes should be broken up into Level 2 Diagrams for Preliminary Design
- Data Dictionary: processes of level two diagrams, entities for database schema

Website Maps

- Topology of the website
- Where a user can go to from one page, details of what pages are accessible from one page to another

Refine Prototypes

- Specific prototypes for different users and their processes
- Continue making prototypes for important processes

Keep working on compiler
