Team members present: Tom Mottola, Jason Czajkowski

List of goals as they came up in conversation with Dr. Yoder:
-something easy to maintain and read
-has a history of old schedules to draw from as resources
-organizes rooms, labs, teachers
-ability to schedule without conflicts (1 person 2 places, etc)
-ability to make a report for each classroom and teacher
-has a master schedule
-ability to find free time and rooms for meetings
-easily edited
-warning system to prevent conflicts, while preserving the user's ability to make that decision anyway
-ability to print reports
-ability to schedule long term and one time events

Summary of major project goals:
-schedule designer
-report generator
-scheduling constraint checker
-assistance in finding common free times for meetings
-database of older schedules to draw from

Actions to be taken as a result of this meeting:
-determine several time periods in the week to be reserved for future client meetings
