

enigma elucidation

Client meeting

Tuesday, October 25, 2011

CS Library, 4:30 - 5:00 p.m

View and Export IAT data

- wishes to be able to view data from all IATs and export them to different formats.

Implement on Client's personal webserver

- details to be e-mailed to team leader

- add this into 1.2 of Requirements Specification

Would like to create tests by first choosing the categories then uploading the stimuli

- diagrams should reflect this

Create a unique ID for people to link them between their test and survey data that is generated.

Client voiced that a nice additional function of S.A.S would be for the administrator to select whether or not they would like the participant to see their results or not

- this is not required

would like to store, for every participant, whether they had positive or negative association
