enigma elucidation
Client meeting
Tuesday, October 4, 2011
CS Library, 4:30 - 5:30 p.m.

The IAT
-Link Test with Survey – to see results together with Test results

-4 categories (2 pairs)
example: male   female
                    science liberal   arts
-Shows items and categories before each IAT (look at Project Implicit)
-List of directions before IAT is taken
-use e and i keys for categorizing stimuli /space bar for moving on to next section(in between blocks
-Blocks
block 1= to make sure Participant knows how to categorize and get used to which side the categories are on: 1 set of pairing. (20 stimuli)
block 2= same as block 1, just with other set of pairing (20 stimuli)
block 3 = categories are linked : both categories that were on the left in the last two blocks remain on the left together in this block. And the same is true for the right (20 stimuli)
block 4=the same set up as block 3 just longer (40 stimuli)
block 5= block 1 except the two categories have switched sides(40 stimuli)
block 6= the categories on the same side for blocks 5 and 2 are linked (20 stimuli)
block 7= same as block 6 just longer (40 stimuli)

example of block set up using example category from before:
M = male; F = female; S= science; LA= liberal arts

Blocks:	LEFT	RIGHT
1 :	M	F
2 :	S	LA
3 :	M & S	F & LA
4 :	M & S	F & LA
5 :	F	M
6 :	F & S	M & LA
7 :	F & S	M & LA

-blocks 3 and 4 are the same so that we can indicate whether or not results need to be thrown out based on latency
-block 5 is a reinforcement block . to get the participant used to the fact that the first pair's categories have switched sides
-survey will come before test. **Not** after
