

Client Meeting #3

Continued Research:

1. Applet vs. Web-based
2. Need to prototype designs for the preliminary design to decide what will work better
 - Using java vs. using user interface on website
3. For any specifications included in software plan- include version numbers
4. Isolate crucial networking issues regarding Java
5. Regarding Database design:
 - oraserv account? Find software engineering account for oraserv
 - Specifications: talk to Ken Swarner to get specs for possible production environment (oraserv) – this part of software plan can be updated
6. Using Oracle for database system?

See Dr. Breimer for information on the scoreboard currently being used and Lederman for the current protocol to figure out what Siena uses for these competitions to get file (judges guide).

For Friday:

1. Must include Annotated bibliography as an appendix(include all sources used)
We decide whether to include in presentation or not
2. If any problems with Dreamweaver on Software Engineering computers, TELL LEDERMAN
3. Client meeting not necessary on Friday- team must decide and let Dr. Lim know

For Powerpoint:

Tear apart current Siena's current contest software system and PC2

Other:

BellArc? Check out- goes through operating system to generate information for you on windows
