

Client Meeting Notes - 10/6/2014

Main Objective - UML Use Case Diagram & User Narrative

How to contact Alumns

- Alum has privacy settings
- Contact button sends a short form with the contacting person's contact information, reason of contact & additional notes
- Alum then reaches out to the person privately using contact information
- Different message for current student(with siena.edu email) and prospective student

Forgot password button

Username is email - password is auto generated and can be changed by person with a profile

When system reaches out to alumnus to try to get them in the system - bring them to a form on the system

Form has a preview submission button that looks nice and allows them to go back and edit

Disclaimer saying that CS Actions now has permission to have this information entered

Once form submitted, profile is created and username/pw is auto generated and sent out to the person is an email.
