

Welcome

Mr. Ken Swarner

Requirements Specification Presentation

October 31, 2003

Mirage Incorporated

Presented by:

Lauren Englisbe, Introduction and Conclusion

Paul Aiuto, General Description

Jeff Habiniak, Specific Requirements

Mirage Incorporated

Paul Aiuto, Systems Administrator

Richard Connell, Webmaster

Lauren Englisbe, Team Leader

Jayme Gresen, Librarian

Jeff Habiniak, Database Administrator

General Description

Product Perspective and Product Functions

- A graphical representation of given Internet packets
- Will display multiple packets and frames in their hierarchical order
- Information for each packet obtained by a mouse click
- Will run independently of platform

User Characteristics

- Must be able to view all the information on the monitor with minimal scrolling
- Must be able to display the software on a projector
- Will obtain information through mouse clicks
- Expected to have little or no knowledge of packets and protocols.

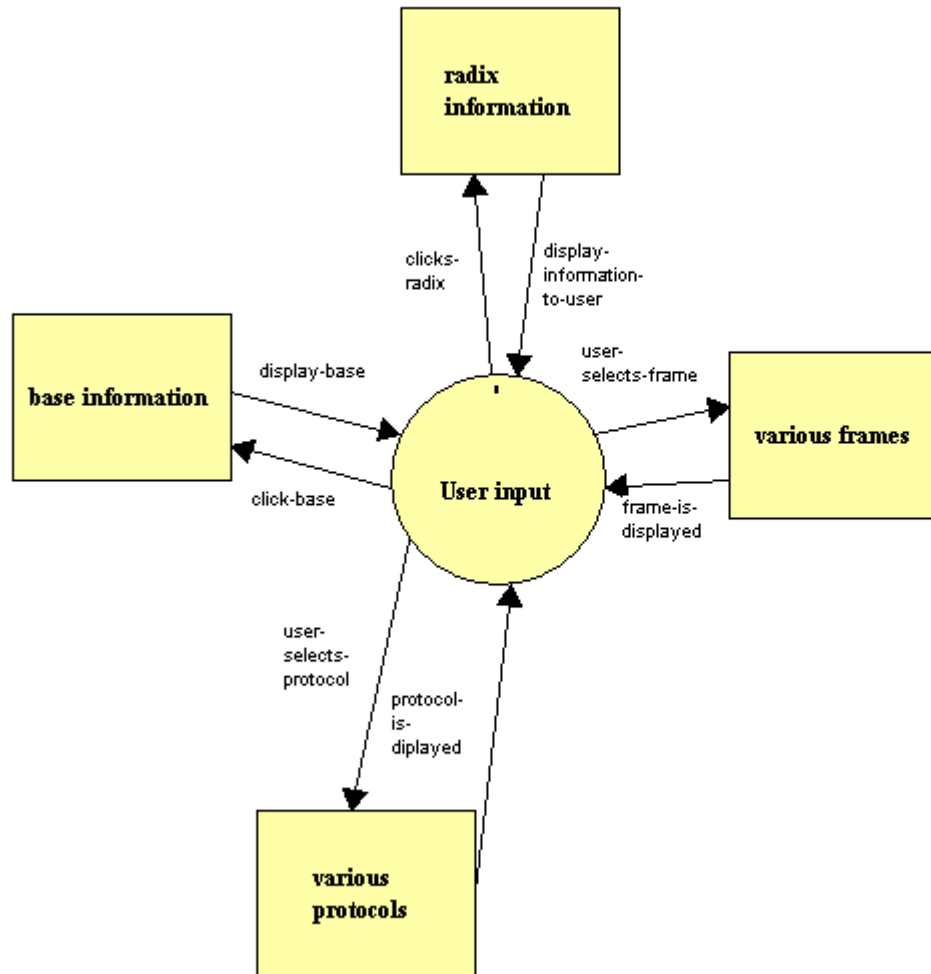

General Constraints

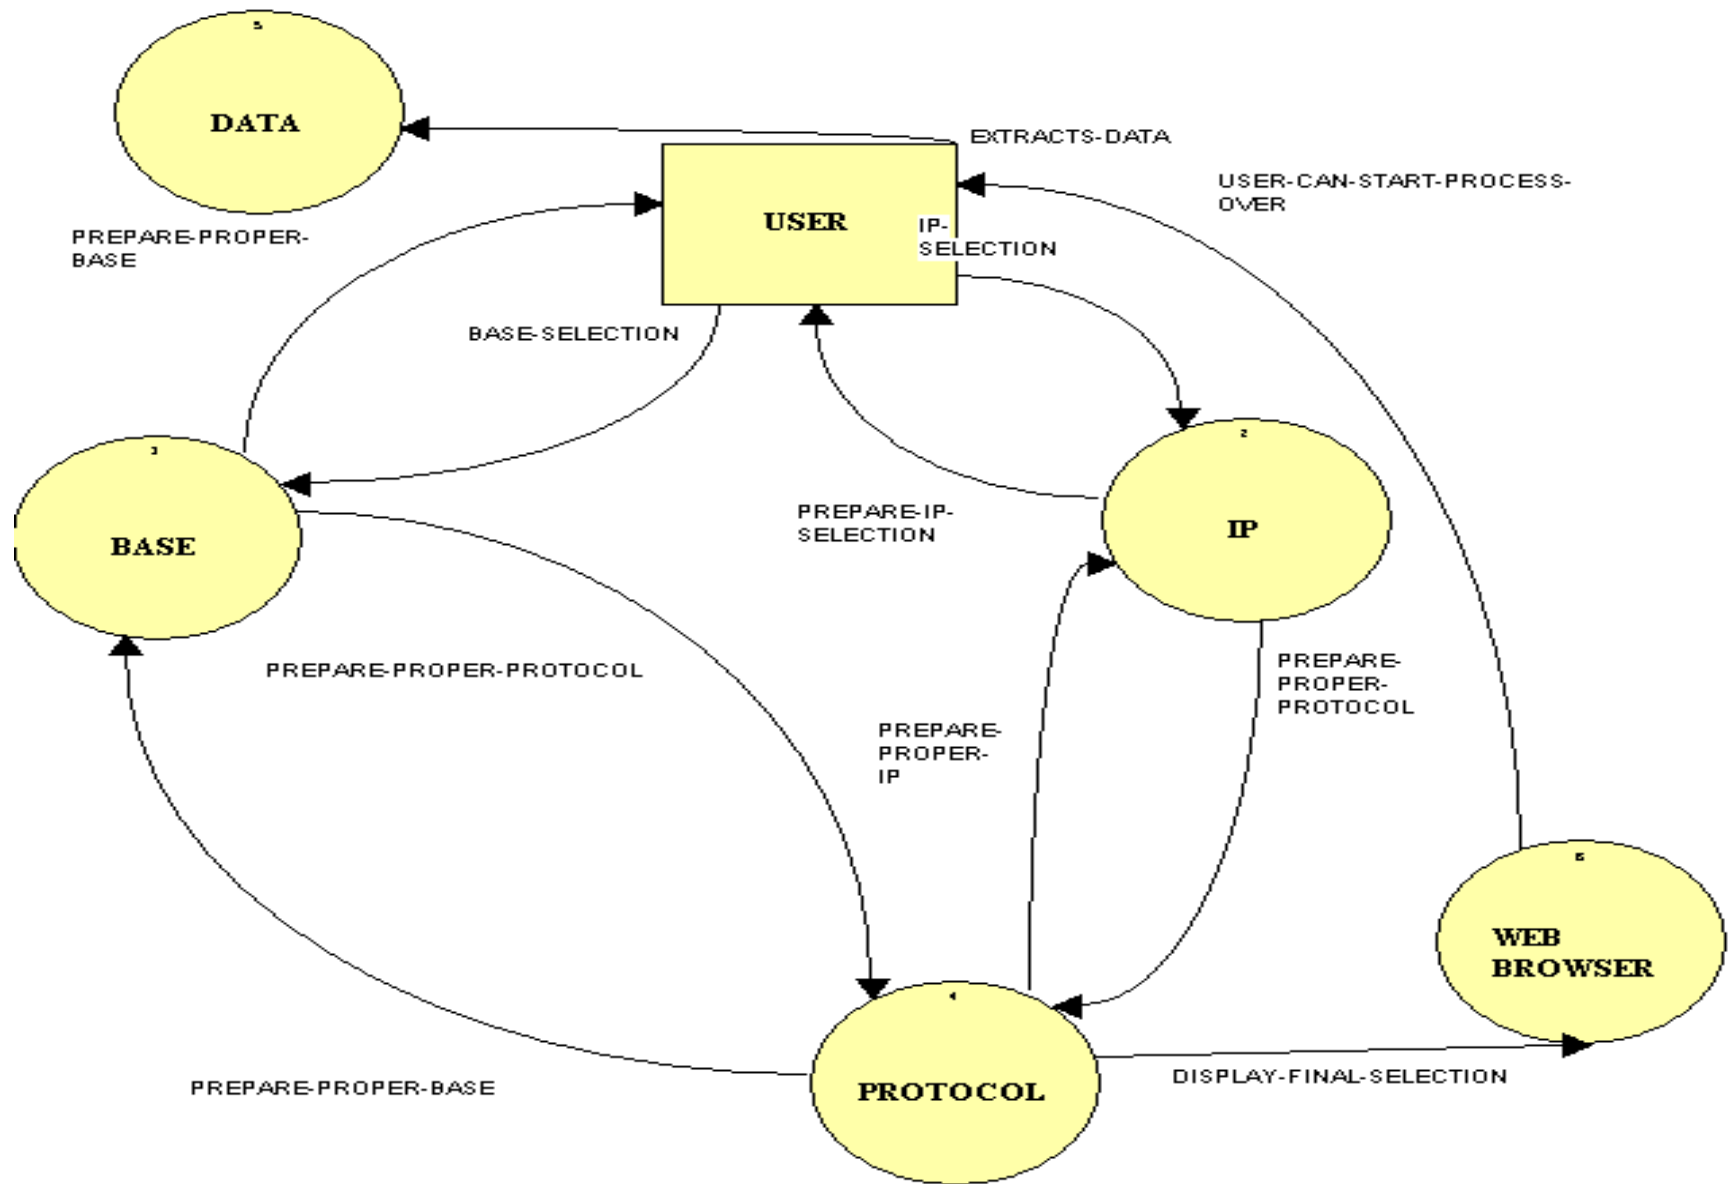

- Size of team
- Amount of time available

Specific Requirements

Functional Requirements

- Load various protocols
- GUI will display protocol components
- Visible menu allows users to go back to previous protocols
- Dynamic combo menu on hierarchical tree

- Show how different protocols are interrelated

- 
- Ability to change an independent field or all fields of the protocol into a desired radix
 - Ability to display different protocols
 - Produces message box to give more information when user clicks on a field
 - Link to RFC number for TCP/IP standard protocols

External Interface Requirements

- Macromedia Dreamweaver for GUI, mated with PHP for functionality

Design Constraints

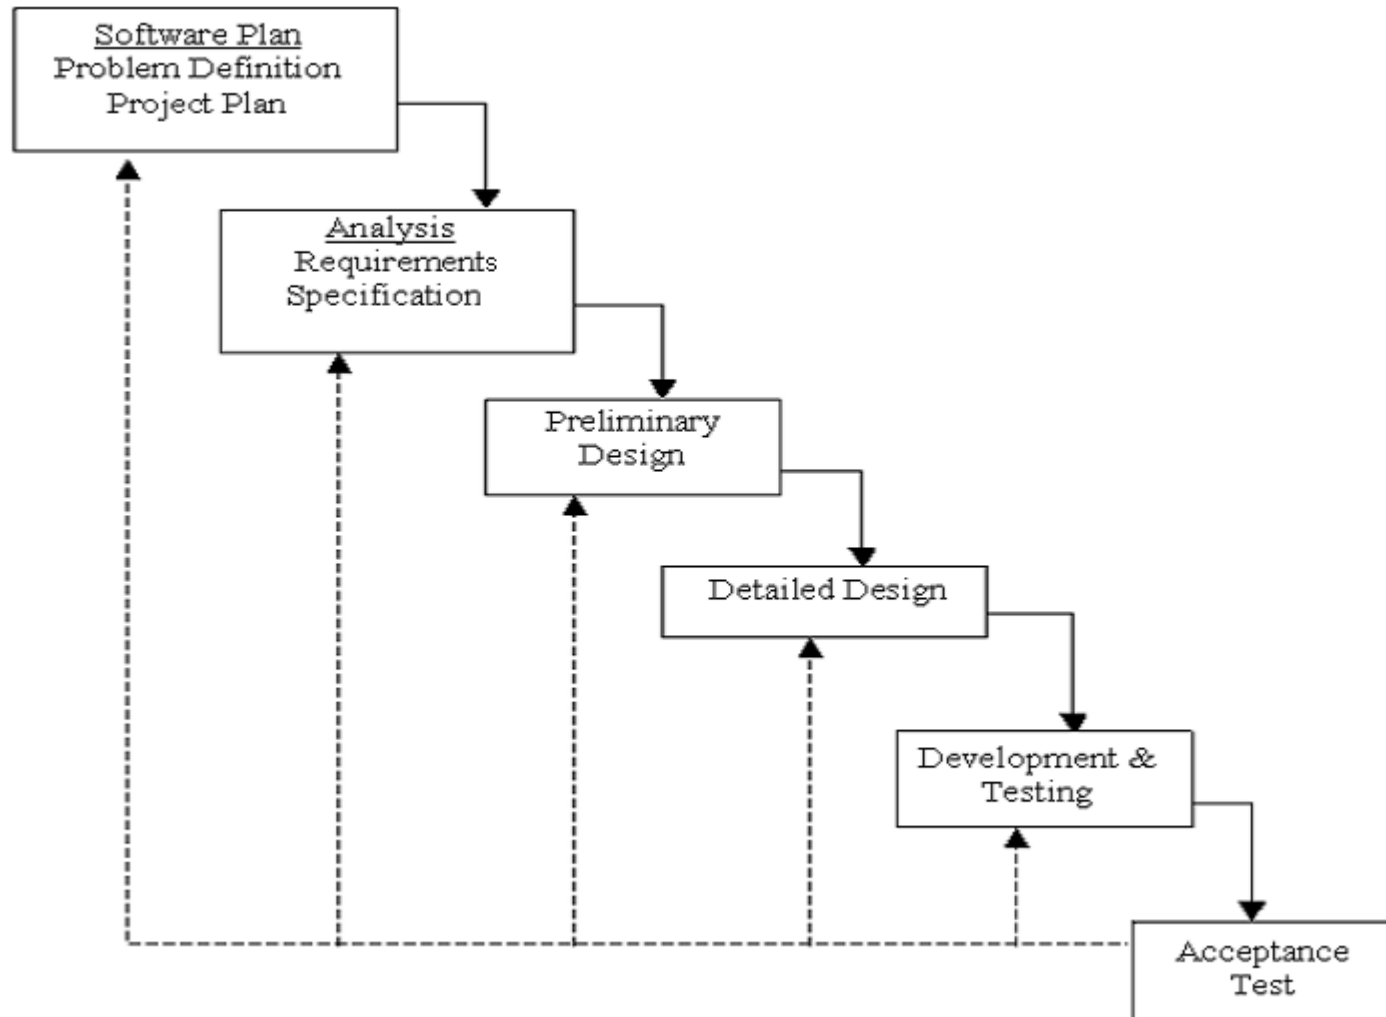

- Descriptor must be web-based
- Hosted on Ares Siena College server
- Microsoft Internet Explorer 5.0 or higher and Netscape Navigator 7.1

- 
- Clearly presentable on 1024x768 classroom projector screens
 - Clear colors for boxes, fields, values, etc.
 - Fields should not obscure other fields
 - Minimum amount of scrolling for better presentation

Other Requirements

- We would like to make the TCP/IP Packet Descriptor robust enough for future Software Engineering teams to expand upon the program as the client desires.

The Next Phase

Timeline

Thank you!
