Client Meeting Number 7 - Requirement Specification
Attended by Sara Pinti, Justin Rose, Emma Bostian, Kevin Conner,
and David Hall
October 28, 2014 9:30 a.m. Roger Bacon Hall 328

- We discussed the Requirements Specification we had presented beforehand and allowed Dr. Eddy to express any questions or concerns
- Dr. Eddy expressed a desire to implement the ability for users to create new accounts, including new usernames and passwords, directly on the main web page
- He also expressed a desire for Faculty-level users to see a summary of an entire class's grades on a single page
- Dr. Eddy expressed a concern that the database may become overfull, and that we implement a system that automatically deletes information after a set time and warns Faculty/Administrators when this deletion will occur; details of this new requirement are yet to be worked out
- Dr. Eddy is still working on a grade calculation for the evaluation tool at this time
