Client Meeting 10
Darren – Zachary, Renee, Michael, Matthew
October 17, 2011

UML Diagrams
-Judges should also be able to see the scoreboard
-Elaborate on Notifying

Dataflow Diagrams
-Went over our diagram
-Level 0, should the arrows be labeled?.. double check
-Darren doesn't know too much about them but says they look good
-Make sure we use Smart Draw

Deployment Diagram
-2 styles
-Look at JOLTS
-First is good for organizational needs
-Second is more formal and will most likely be used next semester because goes into more details we don't know of yet.
-Using SQLite – show how it exists in the system and if on individual devices. However, what if we wont be storing things on client side so we may need to rethink about this for the future.

UML Activity Diagram
-Essentially a flow chart

To Do List
-Would like to see progress on the annotative bibliography
- Won't be in documents but as a link on our website
