Client Meeting 11
Darren – Zachary, Renee, Michael, Matthew, Anthony
October 21, 2011

Over All
-Happy with our dataflows just reorganize
-Website- make sure we keep it up date and keep adding to it
-It's ok if we use filezilla
-All due dates internally are due by Tuesday
- Renee and Zack will format the document on Wednesday for Friday
-Document is due Friday
-By splitting the work up make sure we keep up our communication so everyone knows what each individual worked on and did. This allows all to understand the whole problem.

Non-functional requirement
-System has to be robust, recover part if not all of the contest
-Ide part of the system?? – no it is not
-We wouldn't have to save code but we should start a submission grading all over again
-The scoreboard should have a good save point, preferably after every update, if not it would be "grossly unfair"
-Scalability, run for 30 teams (MAX)

Annotative bibliography
-Features that you saw that we haven't discussed yet?
-Scalability to off set contest – we don't necessarily want to include in SLICE
-Not now but definitely a possibility for the future, ST Rose wants to throw down with us.

TO DO
-Non-functional
-Functional
-Wednesday afternoon Darren has lab at 6 oclock. Best time are between 5-6. Can also talk during his office hours. If we want to set a date well discuss Monday but will keep 5 open.
