

### **Client Meeting 12**

Darren – Zachary, Michael, Matthew  
October 24, 2011

### **Website Update**

- Created new menus for both project notes and project documents
- Create new waterfall model diagram, indicating current phase of the project
- Implemented style changes throughout site

### **Annotated Bibliography**

- Discussed PC<sup>2</sup> and the differences between it and SLICE
- PC<sup>2</sup> designed to work at multiple, separate sites, but in reality it has trouble with firewalls
- PC<sup>2</sup> also has the option of having automated judging or human judges, whereas SLICE would require human judges

### **TO DO**

- Go over requirements specification with Darren on Wednesday, preferably during his office hours, which begin at 2
- Have website updated by Friday at midnight
- Begin work this weekend on requirements specification presentation
