Client Meeting 3
September 26, 2011
Darren - Zachary, Anthony, Michael, Matthew, Renee

Upgrade to service pack two, windows vista
Talk to Ken about windows 7, may be able to get an image and transport it over
Microsoft Alliance where we may be able to get whatever we need
Putting Chrome on so we can test with that browser as well
Photo editing software can also be put onto the computer for specific needs
Watch out for Firefox bc blackboard is on there
Interesting to see if our program will work with firefox 6
Still need to find specifics of oraserv
Doesn't have a preference over MySQL or oracle

SLICE
PHP sql solution web based, patchy server (strong option)
Client – don't rule out other options quite yet
Jquerey

Requirements
Do not want to go over too much detail quite yet
Client wants us to make sure that everything is in our software plan so put our effort towards that right now
Software we want/use, we must supply the service numbers, compiler versions…
Client wants specifics and numbers

To Do List

Email vandenburg to see if he can make us an oraserve account
We do need an account to get specifications

Specifics of software's that they currently use- screen shots to show what is bad about the site for presentation
Ask for help- Breimer or Vandenburg
