1.1 Product Overview and Summary

Our clients, Dr. Darren Lim and Mrs. Pauline White, have requested a web based application that will allow students enrolled in a Java based course to practice Java programming problems and take Java based quizzes and tests provided by their instructor. Our software program, Javanet, will also help instructors track their students' progress and provide students with a dynamic and interactive way of learning. Here at Phoenix Tech we believe we can offer our clients an efficient solution. A solution that will allow instructors to easily upload, assign and grade Java programming problems. Additionally, student progress will be able to be tracked both immediately and gradually, by both the students themselves and the instructors.

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum.*

The login page is the first screen the user will see when attempting to login into Javanet. After entering a valid username and password combination, the user will be taken to the appropriate Welcome Page.

Security Question Answer

The Student Profile Page will be shown after clicking Register on the Student Registration Page, and anytime the user name link in the upper right corner is clicked. The Student Profile Page will allow a Student to view the existing profile information and edit the information available on this page: first name, last name, password, email address, security question, and security answer. The functionality for adding a course by entering a course key will also be available on this page.

1.2.5 Student - Welcome Page

After logging in, a Student will be required to select which course (which they are currently or previously enrolled in) they would like to access.

1.2.6 Student - Home Page

| | | | | |

| Student 3 | | | | | |
| Student 4 | | | | | |
| Student 5 | | | | | |
| Student 6 | | | | | |
| Average | | | | | |

An Instructor can access this page by selecting the *Gradebook*. This page serves as the default Gradebook. This page will display the students and their averages on each assignment given. Instructors may also choose to view the Gradebook by Student or by Assignment. Each Student name and each assignment are also active links.

1.2.21 Instructor - Gradebook Page - sorted by Students

Javanet - Instructor | Gradebook - cd34stuv

Home Courses Assignments Question Pools Gradebook Current View [instructor](#)
Profile: [cd34stuv](#) [Sign Out](#)

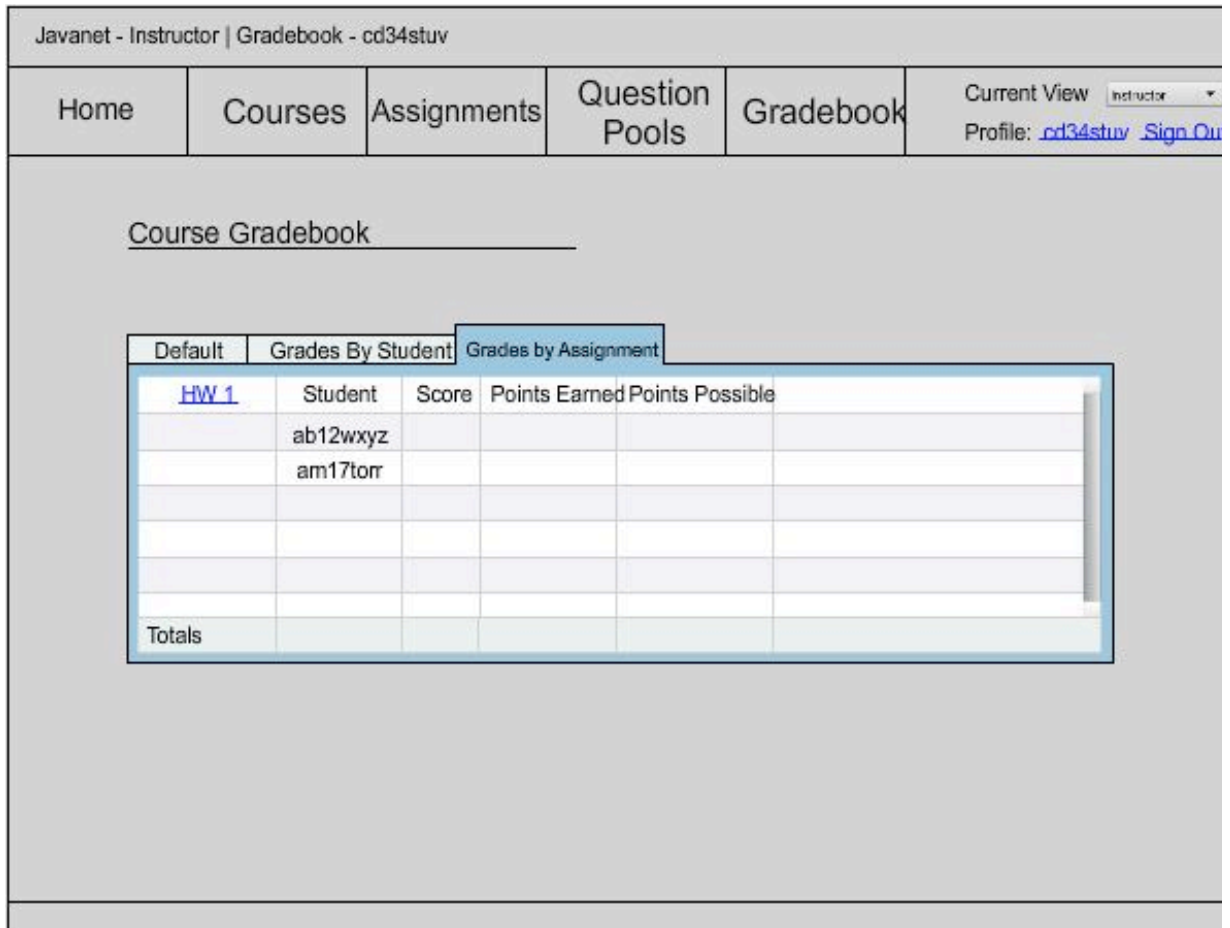

Course Gradebook

Default **Grades By Student** Grades by Assignment

| Student | Assignment | Score | Points Earned | Points Possible |
|---------|------------------------|-------|---------------|-----------------|
| | HW 1 | 80 | 8 | 10 |
| | HW 2 | 85 | 17 | 20 |
| | HW 3 | 78 | 7 | 9 |
| | Test 1 | 92 | 92 | 100 |
| | Test 2 | 88 | 88 | 100 |
| Totals | | 87 | 205 | 239 |

This page can be accessed from the default Gradebook by clicking on a Student name, or by clicking on the Grades By Student tab in the Gradebook. This page shows an Instructor each assignment with its corresponding score, points possible and points earned, for one particular student.

1.2.22 Instructor - Gradebook Page - sorted by Assignments

The screenshot shows the Javanet Instructor Gradebook interface. At the top, there is a navigation bar with tabs for Home, Courses, Assignments, Question Pools, and Gradebook. The 'Gradebook' tab is selected. To the right of the navigation bar, there is a 'Current View' dropdown menu set to 'Instructor' and a 'Profile' link for 'cd34stuv'. Below the navigation bar, the page title is 'Course Gradebook'. A sub-table is displayed with three tabs: 'Default', 'Grades By Student', and 'Grades by Assignment'. The 'Grades by Assignment' tab is active. The table shows a single assignment named 'HW 1' and lists the following data:

| Student | Score | Points Earned | Points Possible |
|----------|-------|---------------|-----------------|
| ab12wxyz | | | |
| am17torr | | | |
| Totals | | | |

This page can be accessed from the default Gradebook by clicking on a particular assignment, or by clicking on the Grades By Assignment tab in the Gradebook. This page shows an Instructor all of the Students with their corresponding scores, points possible and points earned, for one particular assignment.

+ Drag question from Universal or Course Pool to add to private pool
[New Question](#) [New Question Set](#)

+ Drag question from private pool to add to Course Pool

+ Drag question from private pool to request universal publication

Selecting the *Question Pools* tab will bring a Course Coordinator to this page. On this page, a Course Coordinator may drag and drop questions to and from certain pools. A Course Coordinator can also search the pools by entering a search string. In addition, a course coordinator can decide to create a new question or question set by clicking links on this page.

Hello, Administrator Name!

You have [4 pending requests](#) for your review.

Announcements

Administrator Announcement 1:
Mauris fermentum viverra sapien. Morbi nec ante. Quisque orci dui, pellentesque quis, fermentum vel, porttitor ut, urna Mauris auctor dignissim tellus. Fusce a quam a sapien commodo convallis. [edit](#) [delete](#)

Announcement 1:
Vestibulum dui ligula, viverra et, blandit vitae, fermentum quis, turpis. Donec malesuada leo at nisi. Lorem ipsum dolor sit amet, consectetur adipiscing elit.

Announcement 2:
Mauris malesuada sagittis turpis. Aliquam condimentum, lacus sit amet euismod ullamcorper, dolor ipsum fringilla felis, eu sagittis nibh purus ac quam.

Post a new Announcement

Submit

After logging in, the Administrator will be brought to this page. The Administrator will see any pending requests, the most recent announcements posted and be able to post a new announcement for the entire system of Javanet users. The Administrator may also edit or delete any announcements that they have posted.

Question Preview: _____

Given an array of ints, is it possible to choose a group of some of the ints, such that the group sums to the given target with this additional constraint: If a value in the array is chosen to be in the group, the value immediately following it in the array must not be chosen. (No loops needed.)

groupNoAdj(0, {2, 5, 10, 4}, 12) → true
groupNoAdj(0, {2, 5, 10, 4}, 14) → false
groupNoAdj(0, {2, 5, 10, 4}, 7) → false

The Pending Requests Page will show the specific pending requests that the Administrator has. The Administrator can choose to approve, deny, or edit a question or question set.

Create Question

The Administrator will see this page when creating a question. The Administrator can select a title, category, and difficulty for the question. The Administrator can then write the question and solution as well. The Administrator will also be able to add parameters for test sets and hints if desired. The arrows in the create test set section provide the functionality of creating more test sets and more parameters.

When creating a question set, the Administrator will see this page. The Administrator can create a title, select a category, select a difficulty level, and a time limit for completion. The Administrator will be able to edit each question in the set, as well as adjust the amount of attempts and, or points available. The Administrator is able to build a question set with questions from any of the pools.

1.2.34 Enhancements

We expect to further enhance these prototype screens throughout the Detailed Design phase to ensure that the screens meet the style and functionality requirements of our clients. Additionally, we will create more prototype screens if necessary. One particular instance of this being: functionality for Course Coordinators and the Administrator to generate reports is something that we would like to include, but has not been clearly defined at this time.

1.3 Data Flow Diagrams

Please refer to the separate Data Flow Diagrams document.

1.4 Logical Data Dictionary

1.4.1 Cross Reference Index

This Cross Reference Index serves as an Index to the column in the Data Dictionary that defines where each data entity can be found.

1.4.2 Data Dictionary Key

The following abbreviations are used in the Data Dictionary:

NN: Not Null

U: Unique

1.4.3 Data Dictionary

| Name | Type | Restrictions | Description | Screens it Appears on |
|-------------------|-------------|--------------------|---|--|
| announcement | text | | an announcement posted to all welcome pages of users associated with the author | 6, 15, 24, 30 |
| assignmentAvg | int(4) | numeric | average grade on a specific assignment (question set) for all users | 20 14, 15, 16, 17, 18, 19, 20, 21, 22, 24, 25, 26, 27, 28, 29, 30, |
| cNumber | varchar(10) | alphaNumeric NN | the course name and number eg. CSIS220 | 31, 32, 33 |
| completedAssign | int(4) | numeric | number of assignments that have been completed by the student | 6 |
| completedPracSets | int(4) | numeric | number of practice sets that have been completed by the student | 6 |
| courseID | varchar(10) | alphaNumeric NN | id used to register for a specific course and section | 4, 13, 29 14, 15, 16, 17, 18, 19, 20, 21, 22, 24, 25, 26, 27, 28, 29, 30, |
| cSection | varchar(10) | alphaNumeric | course section | 31, 32, 33 14, 15, 16, 17, 18, 19, 20, 21, 22, 24, 25, 26, 27, 28, 29, 30, |
| cSemester | varchar(6) | alphabetic NN | course semester eg. Fall | 31, 32, 33 14, 15, 16, 17, 18, 19, 20, 21, 22, 24, 25, 26, 27, 28, 29, 30, |
| cYear | int(4) | numeric NN | year the course was taught | 27, 28, 29, 30, 31, 32, 33 |

Javanet Data Dictionary

| | | | | |
|-----------------|-------------|----------------------|--|------------------------------------|
| dueDate | date | | date a question set is due | 6, 8, 12, 19, 29 |
| email | varchar(64) | alphaNumeric U NN | users email address | 2, 3, 4, 13, 23 |
| firstName | varchar(32) | alphabetic NN | users first name | 3, 4, 5, 13, 14, 20, 21, 22, 23 |
| hints | text | | any hints including urls the instructor wants to add | 10, 16, 26, 32 |
| lastName | varchar(32) | alphabetic NN | users last name | 3, 4, 5, 13, 14, 20, 21, 22, 23 |
| numAttempts | int(2) | numeric | number of submissions allowed for a specific question in the question set | 10, 17, 27, 33 |
| numCorrectCases | int(4) | numeric | number of correct test cases tested against the student code | 11 |
| numPending | int(2) | numeric | number of pending requests for a course coordinator or an administrator | 24, 30 |
| numSubRemaining | int(2) | numeric | number of submissions the student has remaining for a specific question in the question set | 10 |
| pActualOutput | varchar(32) | NN alphaNumeric | output of the parameter after being run through student source code | 10, 16, 26, 32 |
| password | varchar(32) | NN | users password | 1, 3, 4, 13, 23 |
| pDataType | varchar(16) | alphaNumeric NN | expected data type of the parameter eg. Int boolean array string | 16, 26, 32 |
| percentScore | int(4) | numeric | student grade on the question set in the form of a percentage out of 100 | 11, 12, 20, 21, 22 |
| pExpectedOutput | varchar(32) | NN | expected output after the function is called | 10, 25 |
| pName | varchar(16) | alphaNumeric NN | the name of the paramater as its passed to the signature | 16, 25, 26, 31, 32 |
| pointsEarned | int(4) | numeric | total number of points a student has earned on the question set | 12, 21, 22 |
| pointsPossible | int(4) | numeric | number of points possible for a specific question in the question set | 12, 17, 21, 22, 27, 33 |

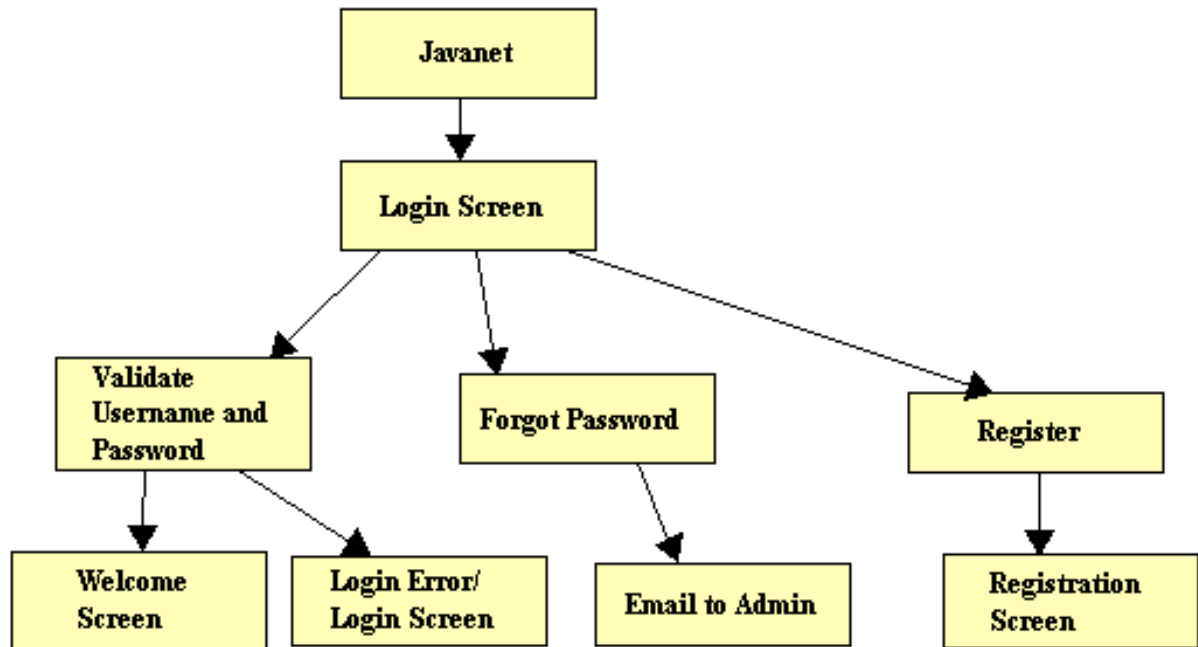

| | | | | |
|-------------------|-------------|--------------------|---|---|
| practiceStatus | Boolean | | status of a practice question set true or false depending on whether the student passed or failed the specific test case | 7 |
| pTestStatus | Boolean | NN | true if the question or question set is approved to be published; false if denied | 10 |
| publicationStatus | Boolean | | | 25, 31 |
| pValue | varchar(32) | NN | value of the parameter Determines whether the parameter is visible to the student users | 10, 16, 25, 26, 31, 32 |
| pVisibility | Boolean | NN | category of the question eg. Arrays, Loops, Recursion | 16, 25, 26, 31, 32 |
| qCategory | varchar(32) | alphanumeric NN | question difficulty eg. Easy, Medium, Hard | 16, 17, 18, 25, 26, 27, 28, 31, 32, 33 |
| qDifficulty | varchar(32) | alphabetic NN | category of the question set eg. Arrays, Loops Recursion | 16, 17, 18, 25, 26, 27, 28, 31, 32, 33 |
| qsetCategory | varchar(32) | alphaNumeric NN | difficulty of the question set eg. Easy, Medium, Hard | 17, 18, 25, 27, 28, 31, 33 |
| qsetDifficulty | varchar(32) | alphabetic NN | time allotted for the question set | 17, 25, 27, 31, 33 |
| qsetTime | time | | | 17, 27, 33 |
| qsetTitle | varchar(32) | alphaNumeric NN | title of the question set possible solution | 8, 9, 12, 17, 18, 19, 25, 27, 28, 29, 31, 33 |
| qSolution | text | | provided by instructor | 11, 16, 26, 32 |
| qTitle | varchar(32) | alphanumeric NN | title of the question description of the problem the student is to solve | 9, 10, 11, 16, 17, 18, 25, 26, 27, 28, 31, 32, 33 |
| questionText | text | NN | string entered by a non-student user to find a question in a pool | 10, 11, 16, 17, 18, 25, 26, 27, 28, 31, 32, 33 |
| searchString | varchar(32) | alphaNumeric | user answer to the security question for identity validation | 18, 28 |
| securityA | varchar(64) | alphaNumeric NN | question to be answered by users before resetting a password | 2, 3, 4, 13, 23 |
| securityQ | varchar(64) | alphabetic NN | are hints available | 2, 3, 4, 13, 23 |
| showHint | Boolean | NN | | 16, 26, 32 |

2.1 Structure Diagrams

A structure diagram is the hierarchical representation of how all users, processes, and data flow will take place.

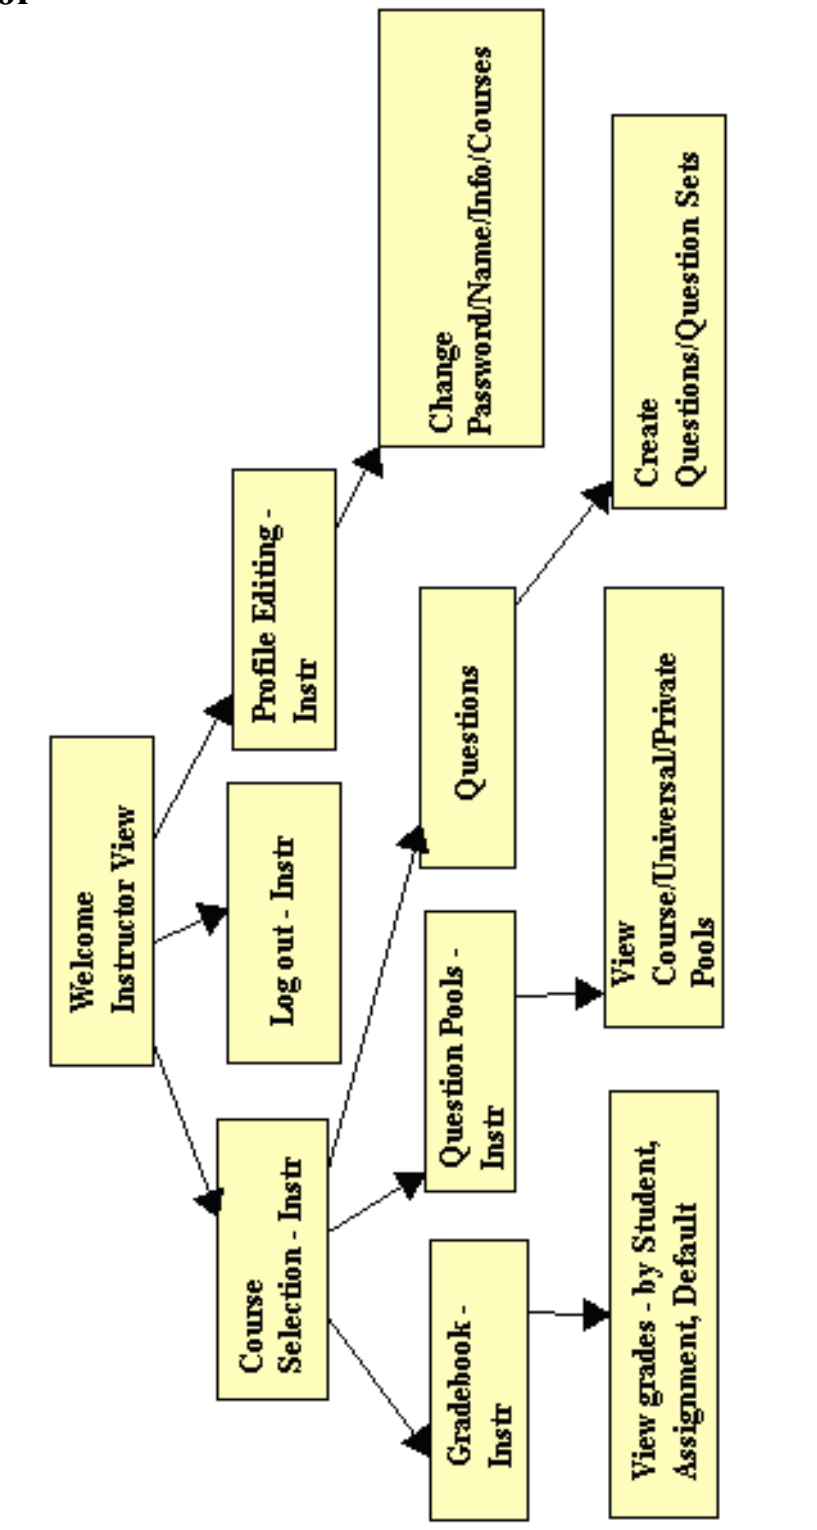

A structure diagram for the Javanet system.

2.1.2 Student

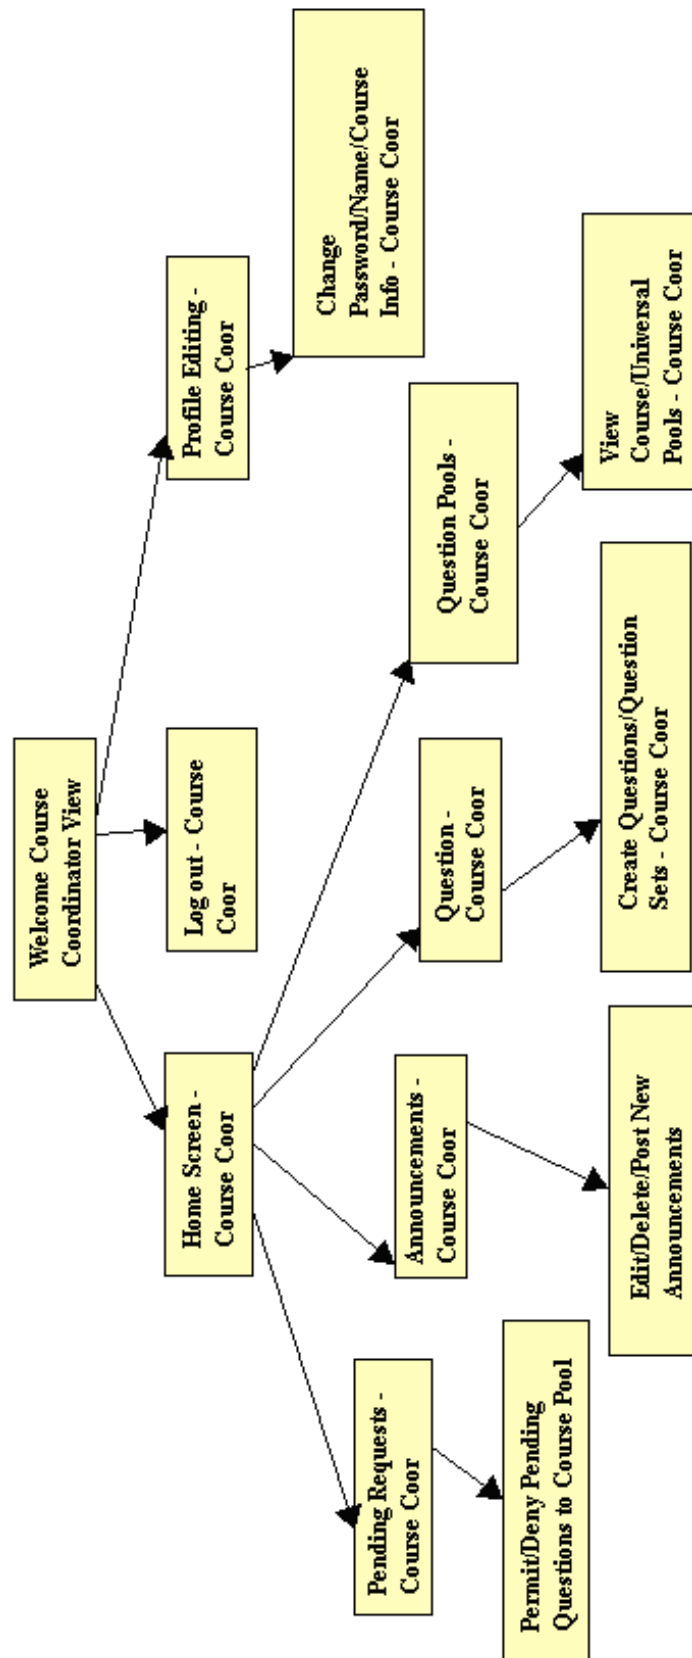

A structure diagram for the Student user.

2.1.3 Instructor

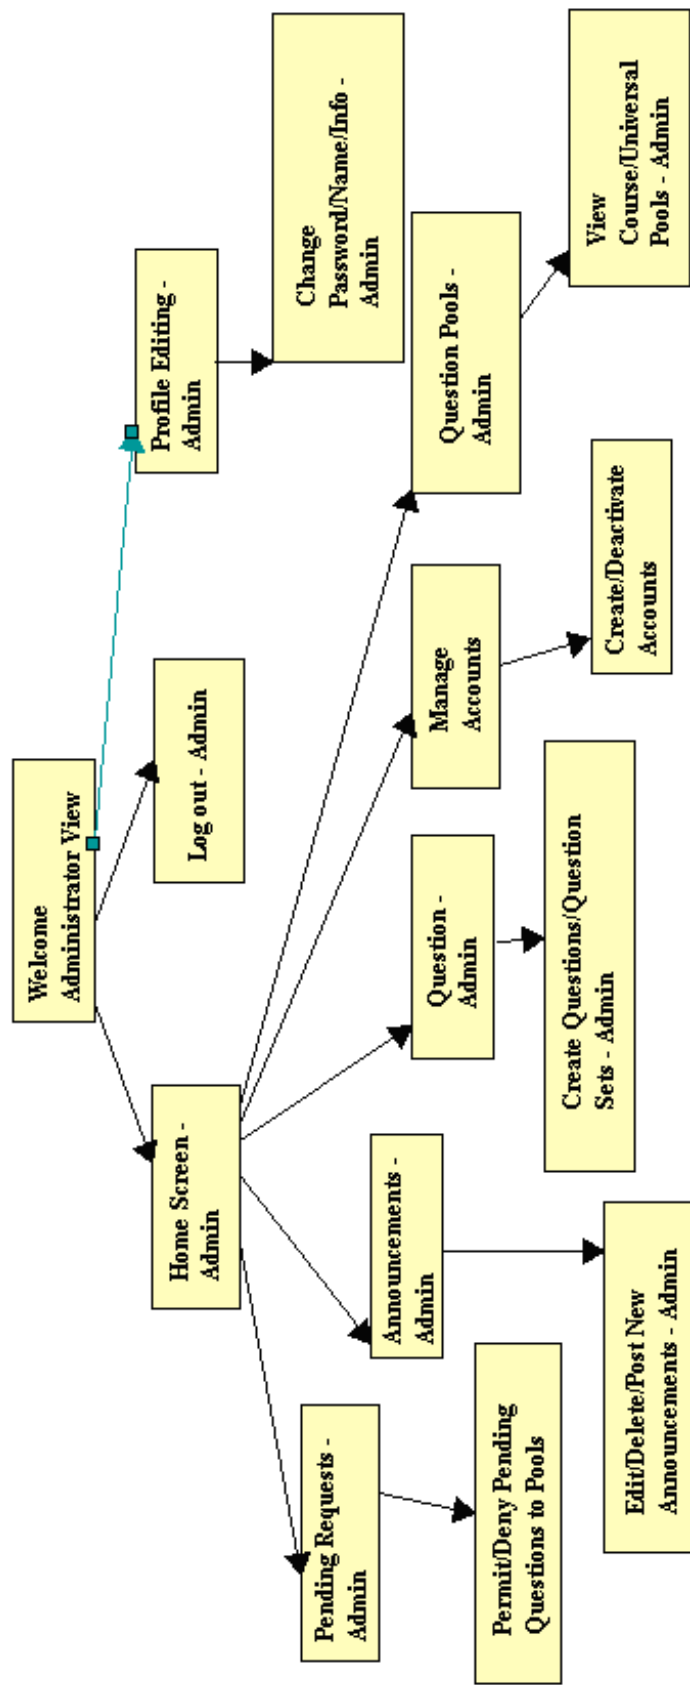

A structure diagram for the Instructor user.

2.1.4 Course Coordinator

A structure diagram for the Course Coordinator user.

2.1.5 Administrator

A structure diagram for the Administrator user.

2.2 Use Case Narratives

Student

The Student user will have the ability to login to and log out of the application through a web interface with a username and password, once they have created an account. When creating an account the Student will be required to create a username and password. The Student will be able to change their password at any time. If the Student forgets their password, they will be able to click a link to an identity validation page to reset the password. The Student will also be able to edit various aspects of their account information at any time. The Student will then be required to enter their name and select what course they are enrolled in. Upon login the Student will be able to select what mode they would like to work in: practice, homework, quiz, or test. In practice mode, the Student will be able to select a category of problems to practice with. In homework mode, the Student will be able to complete the current homework assignment posted by their instructor. In both quiz and test mode, the Student will be able to complete the current quiz or test posted by their instructor. The Student will be required to compile and execute for submission in one step. In all cases, the Student will get instant feedback about their performance, on a category or set of questions, in the form of both a percentage of questions correct and the actual number of questions correct. Students will have the ability to look back at and practice with previous homework assignments, quizzes, and tests with the permission of the Instructor.

Instructor

The Instructor user will have the ability to login to and log out of the application through a web interface with a username and password. The Instructor accounts will be created by the Administrator user. The Instructor users will be given an initial password. The Instructor will have the ability to change their password at anytime. Upon login the Instructor will be able to select what course section page they would like to view. As Student users identify themselves as being enrolled in a specific course, they will appear on the appropriate course page for the corresponding Instructor. The Instructor will have the ability to create new folders/tabs of practice questions, homework assignments, quizzes, and tests. When creating a question, the Instructor will have the following options: including hints for the Students, viewing Student source code, selecting a category for the question, selecting a difficulty level for a question, and selecting the number of compilations allowed for a question or question set. Instructors will have the ability to compile their own private pool of questions. The Instructor may choose to create and publish question sets from their private pool for use by the students enrolled in their course. Instructors may send the Course Coordinator their questions or question sets from their private pool to be published to the Course Pool to share with other Instructors of the course they are teaching. An Instructor may also send the Course Coordinator their questions or question sets to be published to the Universal Pool to be available to all other Instructors. Instructors may also import questions and question sets to their private pool from both the Course and Universal pools. The Instructor will also have the option of how they would like to review results: they can select a Student and scroll through that Student's assignments, or they can select an assignment and scroll through all of the Students. The Instructor will be able to create a test set for the Student solution to be tested against. The Instructor will also have the ability to override a Student's grade when they think the automatically generated grade is inappropriate. After an exam is administered and completed, the Instructor will have the ability to see test statistics across all Instructor sections for the corresponding course. The Instructor will also be able to give permission to a particular Student to view previous assignments, quizzes, and tests. Additionally, the Instructor will be able to click to a Student view in order to best assist Students when they are in need of help.

Course Coordinator

The Course Coordinator will be able to log into and log out of the system. The Course Coordinator will be the coordinator of all sections of one specific course. The Course Coordinator will have the ability to submit statistical data to common content of the specific course that they are the coordinator for. This statistical data will be viewable to all Instructors. The Course Coordinator can switch into Instructor or Student view mode. The Course Coordinator will be able to create questions or question sets to go into the Course Pool. The Course Coordinator will be able to import questions or question sets sent by Instructors to the Course Pool to be shared with other Instructors of the course, and import questions or question sets sent by Instructors to the Universal Pool to be available to all other Instructors. If necessary, the Course Coordinator will have the ability to change the grades of the Students of the course that they coordinate. The Course Coordinator will be able to view the grade book sorted by assignment, or specific Student. Across the course they are coordinating, the Course Coordinator may also view Student progress.

Administrator

The Administrator user will have the ability to login to and log out of the application through a web interface using a username and password provided by the application developers. Once logged into the application, the Administrator will have the ability to create Instructor and Course Coordinator accounts. The Administrator will have the ability to deactivate user accounts, and manage and reset passwords. The Administrator can upload Instructor questions and question sets, upload Instructor test sets, and create questions and question sets to go into the Universal Pool. The Administrator will be able to submit statistical data to common content for all Instructors to see. Administrators will be able to switch into Instructor, Student, or Course Coordinator view mode. The Administrator will have the ability to view the grade book sorted by assignment, specific student, or course. Administrators will be able to view student progress and assignment statistics across all courses. If necessary, the Administrator will be able to change grades. The Administrator will be able to archive student information from the database.

2.3 Functional Requirements Inventory

The following list outlines the required functionality to be included in the final solution.

Javanet will be a web-based application viewable on the four major browsers. These browsers are Internet Explorer 7.0 and 8.0, the latest version of Firefox 2 and 3, and Safari 2.* or better.

- Index page displays a login screen common to all users.
- All other pages display a “logout” option for all users.

The requirements are listed according to user case, as follows:

Student:

- Will be able to self enroll by creating a username (Siena email based) and password.
- Will be able to log in with the confirmed username and password through a web interface:
 - An incorrect log in will display an appropriate error message.
 - A link to an identity validation page will be provided if password is forgotten.
- Will be able to view and edit various account information upon clicking username link.
- Will be able to enroll into their appropriate course.
- Will be able to select a “Practice” tab.
 - Will be able to select practice question sets under given categories.
 - A check mark will be rewarded once the questions in a question set are completed.
 - A smile face will be rewarded once a category is completed.
- Will be able to select an “Assignments” tab.
 - Will be able to choose from chronologically ordered assigned homework.
 - Will be able to choose from chronologically ordered assigned quizzes.
 - Will be able to choose from chronologically ordered assigned tests.
- Will be able to write, compile (or save) and submit solutions to questions.
 - If hints for questions have been enabled, the option to view those hints is available.
 - Test cases and their solutions can be seen on the right-hand side of the screen.
 - A read only version of Students’ question solutions will be available once they have been submitted and graded.
- Will be able to view their grades via a “Gradebook” tab.
 - Links for each assignment will redirect students to a summary page.
- Will be able to log out of the system.

Instructor User:

- Will be able to login to the application through a web interface with a username and password.
- Will be able to select what course section page to view on login.
- Will be able to view and edit various account information upon clicking username link.
- Will be able to post a new announcement for students of that course to see upon login.
- Will be able to select “Courses” tab to switch into another course.
- Will be able to select an “Assignments” tab.
 - Will be able to choose from chronologically ordered assigned homework redirecting to the gradebook.
 - Will be able to choose from chronologically ordered assigned quizzes redirecting to the gradebook.
 - Will be able to choose from chronologically ordered assigned tests redirecting to the gradebook.
- Will be able to select a “Question Pool” tab.
 - A search function will be available to filter through the Universal, Course, and Private pools.
 - Will be able to drag and drop questions from Universal and Course pools to Private pool.
 - Will be able to drag and drop questions from Private pool to Universal or Course pools to request publication from Administrator.
 - Links under private pool will allow creation of a new question and or question set.
- Will have the following options when creating a question set:
 - Creating a title.
 - Selecting a category for the question set.
 - Selecting a difficulty level for a question set.
 - Creating a time limit.
 - Editing each question in the question set or dragging into trash bin for unwanted questions.
 - Adjusting the number of attempts allowed and points for each question.
- Will have the following options when creating a question:
 - Creating a title.
 - Selection a category for the question set.
 - Selecting a difficulty level for a question set.
 - Text box to enter question.
 - Text box to enter solution.
 - Entering and selecting parameter types and their solutions.
 - Enabling hints.
- Will be able to select a “Gradebook” tab.
 - Sub tabs will include: “Default”, “Grades By Student”, and “Grades By Assignment”.
- Will be able to override a Student’s grade when the automatically generated grade is inappropriate.
- Will be able to see statistics across all Instructor sections for the corresponding course after an exam is administered and completed.

- Will be able to see statistics across all Instructor sections for the corresponding course after a homework assignment is administered and completed.
- Will be able to give permission to a particular Student to view previous assignments, quizzes, and tests.
- Will be able to click to a Student view in order to best assist Students when they are in need of help.
- Will be able to log out of the system.

Course Coordinator User:

- Will be able to log into the system.
- Will be able to switch into Instructor and Student view mode.
- Will be able to create questions or question sets to go into the Course pool.
- Will be able to import questions or question sets sent by Instructors to the Course pool to be shared with other Instructors of the course.
- Will be able to import questions or question sets sent by Instructors to the Universal pool to be available to all other Instructors.
- Will be able to change grades for students of the course that they are the coordinator for, if needed.
- Will be able to view grade book sorted by assignment.
- Will be able to view grade book sorted by specific student.
- Will be able to view student progress across the course that they are the coordinator for.
- Will be able to log out of the system.

Administrative User:

- Will be able to log into system.
- Will be able to create Instructor and Course Coordinator accounts.
- Will be able to change current view mode to Course Coordinator, Instructor, or Student.
- Will be able to edit Course Coordinator, Instructor, and Students account information while in their own view mode.
- Will be able to select a “Requests” tab.
 - Will be able to edit, approve, or deny questions pending publication.
 - A question preview will be displayed on the right-hand side.
- Will be able to select a “Question Pool” tab.
 - A search function will be available to filter through the Universal, Course, and Private pools.
 - Will be able to drag and drop questions from Universal and Course pools to Private pool.
 - Will be able to drag and drop questions from Private pool to Universal or Course pools to request publication from Administrator.
 - Links under private pool will allow creation of a new question and or question set.
- Will have the following options when creating a question set:
 - Creating a title.
 - Selecting a category for the question set.
 - Selecting a difficulty level for a question set.
 - Creating a time limit.
 - Editing each question in the question set or dragging into trash bin for unwanted questions.
 - Adjusting the number of attempts allowed and points for each question.
- Will have the following options when creating a question:
 - Creating a title.
 - Selection a category for the question set.
 - Selecting a difficulty level for a question set.
 - Text box to enter question.
 - Text box to enter solution.
 - Entering and selecting parameter types and their solutions.
 - Enabling hints.
- Will be able to create questions and question sets to go into the Universal pool.
- Will be able to change grades, if needed.
 - Switching view modes to either a Course Coordinator or Instructor.
- Will be able to archive student information from the database.
- Will be able to deactivate accounts.
- Will be able to log out of the system.

3.1 Testing Overview

Javanet will undergo extensive unit testing during the Acceptance Test phase of our project. This testing will ensure Javanet meets all functional and non-functional requirements as stated in the functional requirements inventory section of this document, Section 2.3. The acceptance test will be presented to demonstrate our software's compliance with the needs of the clients. The Unit Test Catalog and accompanying Unit Tests are provided in the accompanying Test Plan Document.

4.1 Enlarged Timeline (Gantt Chart)

4.2 Glossary of Terms

All glossary definitions provided by Wikipedia.org.

API

An application programming interface (API) is a set of functions, procedures or classes that an operating system, library or service provides to support requests made by computer programs.

Classic Waterfall Model

The waterfall model is a sequential software development model (a process for the creation of software) in which development is seen as flowing steadily downwards (like a waterfall) through the phases of requirements analysis, design, implementation, testing (validation), integration, and maintenance.

Course Pool

Collection of question sets that an Instructor of the Pool's specific course has published to the pool. These published questions are then given permission to join the pool of existing question sets in the pool by the Course Pool Administrator.

CSS

Cascading Style Sheets (CSS) is a style sheet language used to describe the presentation of a document written in a markup language. The most common application of CSS is to style web pages written in HTML and XHTML, but the language can be applied to any kind of XML document, include SVG and XUL.

Gantt Chart

A Gantt chart is a type of bar chart that illustrates a project schedule. Gantt charts illustrate the start and finish dates of the terminal elements and summary elements of a project.

GUI

A graphical user interface (GUI) is a type of user interface which allows people to interact with electronic devices like computers, hand-held devices (MP3 Players, Portable Media Players, Gaming devices), household appliances and office equipment.

Hardware

Hardware is a general term that refers to the physical artifacts of a technology. It may also mean the physical components of a computer system,

Java

Java refers to a number of computer software products and specifications from Sun Microsystems that together provide a system for developing application software and deploying it in a cross-platform environment.

Linear Sequential Model

The Linear Sequential Model is a software process model that involves a systematic progression through analysis, design, coding, testing and maintenance phases. It is also referred to as the "waterfall model".

Mac OS X version 10.4 “Tiger” was the fifth major release of Mac OS X, Apple’s desktop and server operating system for Macintosh computers. Tiger was released as the successor to Mac OS X v10.3 “Panther”

MySQL

MySQL is a relational database management system (RDBMS) which has more than 11 million installations. The program runs as a server providing multi-user access to a number of databases.

Operating System

An operating system (commonly abbreviated *OS* and *O/S*) is the software component of a computer system that is responsible for the management and coordination of activities and the sharing of the resources of the computer.

PHP

PHP is a computer scripting language. Originally designed for producing dynamic web pages, it has evolved to include a command line interface capability and can be used in standalone graphical applications.

Private Instructor Pool

A specific Instructor’s own personal collection of questions and question sets that they have created/uploaded to their private pool, which Students and other Instructors do not have access to.

Software

Software is a general term used to describe a collection of computer programs, procedures and documentation that perform some tasks on a computer system.

Source Code

In computer science, source code (commonly just source or code) is any sequence of statements or declarations written in some human-readable computer programming language. Source code is written in a programming language, which is usually a simplified form of the English language to reduce ambiguity. Source code allows the programmer to communicate with the computer using a reserved number of instructions.

Universal Pool

The Universal Pool is a collection of question sets that may have been published by any Instructor of any course. The question sets are added to the pool only when they Universal Pool Administrator has granted permission.

Workstation

A workstation, or *engineering workstation*, is a high-end microcomputer designed for technical or scientific applications. Workstations are intended primarily to be used by one person at a time, although they are commonly connected to a local area network and run multi-user operating systems.

Windows Vista

Windows Vista is a line of operating systems developed by Microsoft for use on personal computers, including home and business desktops, laptops, Tablet PCs, and media center PCs.

XHTML

The *Extensible Hypertext Markup Language*, or XHTML, is a markup language that has the same depth of expression as HTML, but also conforms to XML syntax.
