S.E.E. Solutions
Client Meeting Notes 6
10/4/12
Tyler Mann, Brett Rudloff, Carl Tompkins

Start 5:53 P.M.

General

Register <includes> meal

Submitter is not an attendee

Make the calendar. System creates it but it is not a part of the use case diagram.

Use case is not meant to show implementation, design or ordering.

Submit and Review should be left separate

Notify – If the user has to log on to see if they have been accepted they would be interacting with it. Used also as a reminder for payment. It would technically be 2 different cases.

Programming Contest Chair:
- Uses to find out who the participants for and how many teams there are.

Vendor:
- Register (It lets the conference chair know that a vendor wants to be there) and they can be put on a calendar. The Vendor can be considered an attendee

Presenter:
- Submitter that has been accepted. Have to be able to resubmit something, if they don't that means that the conference will take their first submission. After they are accepted they need to formally register for the conference.

Conference Chair:
- May want to have a report.
- We can wait on it till we outline the system

Registration Committee Chair:
- They have to take registrations online and deal with the payments.

End 6:14 P.M.
