

CLIENT MEETING #5					
Date	10/04/2012	Start Time	6:00 PM	End Time	6:00 PM
Attendees	Chris Small, Ryan Kennedy, Tyler Vorpahl				
Client	Dr. Darren Lim				

Submitter is definitely an attendee

Making the calendar, is separate from any users. A conference chair hits a button and it's made, it is a system issue. It is something that should not be put in the user case diagram; it's not an interaction by the user.

Programming contest chair, uses the system to figure out how many teams there are and who are the participants. Other than that, not much interaction with the system.

Vendor, register in the system and to let the conference chair know and as part of the conference. Let vendors register in the system.

Presenters, is a submitter who has been accepted. They may have to edit their papers and resubmit for the "camera ready" final product, such as margins and ensuring it is in the 5-6 page length, basic formatting issues.

The web server and the database are the two nonhuman actors.

There is no verification for if someone wants to join a specific team.
