Team Meeting Summary
By: Vito Urbano

Members in attendance: Ryan Rose, Paul Borchers, Ryan May, and Vito Urbano

In today's team meeting, the following issues were discussed:
- Organization of test plan.
- Killer Robot discussion.
- Our next step.

Vito Urbano delivered the Test Plan to Ryan Rose as requested and all the members of the group looked over the document and made any necessary changes before handing it in. Ryan Rose found some information missing that he would like added to the document, so this work was assigned to Vito Urbano.

After the Test Plan was reviewed and printed, we then discussed the Killer Robot questions which we were about to present in class later. The order of questions was reviewed and anything that was not clear was sorted out.

After the Killer Robot review, Ryan Rose went over the work he wanted to be completed by the time of our next meeting. Ryan May and Paul Borchers were asked to draft some new prototypes for the client meeting being held Thursday. After this, there was no other further business to discuss so Ryan Rose ended the meeting at 6:00pm.

Duration: 30 minutes
