5:30pm
Software Engineering Lab

Team Meeting Summary
By: Vito Urbano

Members in attendance: Ryan Rose, Paul Borchers, Ryan May, and Vito Urbano

In today's team meeting, the following issues were discussed:

- Next steps.
- Killer Robot.
- Database meeting.

Ryan Rose discussed the next steps the team is going to take and reviewed the document due dates. Vito Urbano was assigned to submit a complete revision of the test plan document according to topics discussed last class.

Our group was still presenting for Killer Robot, so we reviewed the questions once more as a group and then figured out a time for Paul Borchers and Ryan May to meet with Dr. Lim to discuss the database construction.

All matters were discussed and there were no further questions so Ryan Rose closed the meeting at 6:00pm.

Duration: 30 minutes
