

Client Meeting

3:00 to 3:25

September 20, 2013

Location SW Lab

Intendance: Dr. Lim, Luke Greiner, Abigail McCarthy, Denis Kalic

Quick look through of Software Plan

- Problem Statement is good
- Fix Gantt Chart to not include holidays
-

Expectation for Presentation:

- All teams are going on Monday, about 20 minutes each
- Introductions for Presentation: Associate Professor of Computer Science
- Be sure to have the logistics down, timed out for each slide, who is going where and taking control of the computer
- Everyone should speak

Project:

- Student Accounts
 - Unique registration code for students to login the first time, then set up accounts.
 - One account that can go in and out of different courses, using Blackboard as a model
 - System should not crash in infinite loops, null pointers, index out of bounds, etc. Indicate error in test cases and also with standard error messages
 - Test cases need to be resolved within a minute, check for errors
 - Admin Privileges for a few faculty members. Three tiers of access, students, faculty admins
