

Team Meeting
October 27, 2013
Start: 6:00
End: 10:30
RB328

Attendance: Luke Greiner, Denis Kalic, Patrick White, Peter Truong, Abigail McCarthy, Robby Tateo

Practice Requirement Specification Presentation

Luke: Introductions, Problem Overview, Waterfall Model, Timeline

Denis: User Case Narratives

Robby: Use Case Diagrams

Peter: Data Flow Diagram

Abigail: Functional and Non-functional Requirements

Patrick: Prototypes

Questions for next client meeting:

- Do you have a preference for password restrictions
- Can the administrator delete and/or hide questions from view? Should the course coordinator also have these abilities? In the last meeting you said that questions should be preserved in order to keep records on the questions (frequency of use, data on the correct/incorrect response rates) however what should happen for a question that is out of date with the curriculum or proven to be ineffective?
