

Team meeting
October 9, 2013
Software Lab
8:30-9:30

In attendance: Luke, Pat, Denis, Robby, Peter, Abigail

Luke and Pat—Functional requirements
Robby—UML Diagram
Denis and Peter—Data Flow diagrams
Abigail—Topic lead-ins for Requirements doc

Luke will send out an email to everyone to do a level one data flow diagram to be done for the next team meeting.

Next Client Meeting: Friday October 11,2013
Next team meeting: Sunday October 13,2013

Client Meeting Question:

- If students should create accounts?
 - If students create accounts, should faculty create their own account or is that still up to the Admin to create faculty accounts?—pros consistant work on admins, cons—association to courses?
 - Admins set up account with username (siena email) and unique password
- Question pools
 - Different levels? Faculty submission—Course question pool? Separate for data structures/120?
 - Security of question pool—protection of a faculty's question, copy rights etc.
 - Are all assignment question added to pool directly? Does Admin/Course-Coordinator only add questions to the pool
- Oracle or MySQL, Olson, specifics for database and server
