Appendix E: Cross-Browser Issues

Table of Contents
1. Internet Explorer 8 ........................................................................................................................................... 3
2. Google Chrome ............................................................................................................................................... 9
1. Internet Explorer 8

1.1. The SaintBook logo is off center on every page.
1.2. The “Browse” button is in the wrong place.
1.3. The underlining for the main tabs does not show up entirely and the sub menu is moved to the right and about a fraction of the size it is needed to be.
1.4. The “Find Group Friends” button is in the wrong place.
1.5. When trying to select the top members for your moderated group, sometimes some members do not show up and neither does the “Make Changes” button.
1.6. The name of the user or group you are viewing is much larger than it should be.
2. Google Chrome

2.1. Bottom of the background randomly is missing when the page is refreshed.
