11.2 Guest View – User Profile Tab ................................................................. 94
12 Super Admin Screens .................................................................................. 95
12.1 Super Admin View .................................................................................. 95
1. Login Screens

1.1 General Login Screen

This is the screen all users will see before logging in. The user will have to enter the e-mail and password, if they have already registered, or they can create an account by clicking the Create an Account link. If a user forgets their password they can also click the Forgot your password? link to have it changed.
1.2 Login – ERROR Invalid Character

This screen will appear if the user is attempting to login and enters an invalid character. The user will see a message pop up in red letting them know they have entered something invalid and that they need to fix it. Once again the user will be able to create an account if they are not already registered or they can change their password if they have forgotten it.
1.3 Login – ERROR Invalid E-mail

This screen will appear to the user if the user attempts to login with an invalid e-mail address. A message will pop up to tell the user the e-mail is wrong, and the user will have to try logging in again. The Create an Account and Forgot your password options will still be available.
1.4 Login – ERROR Invalid Password

This screen will display to the user if the user attempts to login using a password that does match the e-mail that was entered. The user will have a chance to correct the password and try logging in again. The user can also create an account if they need to or they can change their password if they have forgotten it.
1.5 Login – Correct Info Entered

Once the user has entered all of the correct information, the screen will look similar to this one. Correct e-mail and password entered. The user can then click the **Sign In** link and log in to the SaintBook site.
2 Registration Screens

2.1 General Registration Screen

This is the basic registration screen that all users will see before they have created an account. Anyone wishing to become a registered user of SaintBook will need to enter a valid Siena e-mail address and then re-enter it to be sure it is typed correctly. If someone doesn’t have a Siena e-mail they can use an alternate e-mail as well but they will be registered as a guest and have limited abilities. The Confirm button will be grayed out until the user enters correct data.
2.2 Register – ERROR Invalid Characters

This is the registration screen again but with incorrect information entered. If the user sees this screen means they have entered an invalid character in the e-mail address field. The message saying invalid characters have been entered will be displayed in red notifying the user of the mistake. The **Confirm** button will still be grayed out because the information is not correct.
2.3 Register – ERROR E-mail does not match

This screen will appear to the user if the user enters two e-mail addresses that do not match. The purpose of having the re-enter e-mail field is to be sure the e-mail is typed correctly for future use so if the two don’t match, the user needs to correct this. Again, the Confirm button will not be available until the information is typed correctly.
Once the user has entered their e-mail twice and it matches both times, the Confirm button will become active and the user can click the button to continue the registration process.
2.5 Register – Confirm E-mail

After the user has clicked the confirm button to register with their e-mail address, this message will be displayed. This message lets the user know that they need to check their e-mail to complete the next step in the registration process.

Almost Done!

An email has been sent to your email address with further instructions on how to complete your registration process.

Go to Login Page
2.6 Register – Confirmation E-mail

SaintBook Registration!

subject SaintBook Registration!

Thank you and Welcome to SaintBook!

Before we can activate your account one last step must be taken to complete your registration.

Please note - you must complete this last step to become a registered member. You will only need to visit this URL once to activate your account.

To complete your registration, please visit this URL:

If you are still having problems signing up please contact a member of our support staff at team.digitalevolutions@gmail.com

All the best,
Siena College and the SaintBook Team!

This is the e-mail that will be sent to the user once they have submitted their e-mail address for registration. The e-mail will tell the user that they need to click the link included in the e-mail to complete the registration process and verify their e-mail.
This is the next step in the registration process. Here the user will be asked to enter their First Name, Last Name, Password, Confirmation Password, and Graduation Year. The password needs to be entered twice to be sure they both match. For the graduation year the user will only be able to select a year that is 5 years out from the current year. This is to prevent users from entering a graduation year too far in the future just so they can have access to the system longer. The Complete button will not be accessible until the user fills in all of these fields.
This screen will appear to the user if they are attempting to enter invalid information in one of the above fields. The user will be notified by the message in red that they have entered invalid characters and they will be required to fix the info before moving on. The Complete button will be grayed out until the information is entered correctly.
2.9 Register Info – ERROR Passwords do not Match

If the user is entering their information and enter two passwords that do not match, this message will be displayed. The user will be notified by the message in red that the passwords they entered do not match and they will be required to fix the passwords before moving on. The user will not be able to click complete until the passwords match.
Once the user has entered all of the information for each of the requested fields, the screen will look similar to this. The **Complete** button will now be active and available for the user to click since all information is filled in and passwords match.
2.11 Register – Complete

This is the screen that will be displayed to the user once all steps of the registration process have been completed. The user will now be a registered user and can navigate to the login page via the Go to Login Page button. There the user can login and begin viewing SaintBook.
3  Forgot Password Screens

3.1  Forgot Password – General

This is the general Forgot Password screen that will be displayed to the user. If a user has forgotten their required password, the user can enter their e-mail address and click Submit, and then a follow-up e-mail will be sent to that address telling the user what to do next to reset a password.
This is the Forgot Password screen that will be displayed to the user if the user has entered an e-mail address containing invalid characters. A message will appear at the bottom of the screen, in red, indicating to the user that an invalid character(s) has been entered and needs to be fixed. The user can then enter the correct e-mail and click Submit to continue the process.
3.3  Forgot Password – ERROR Invalid E-mail

This Forgot Password screen will be displayed to the user if the user has attempted to enter an e-mail address that is not valid. This means the e-mail is not stored anywhere in the database and there is no record of it so therefore the user will not be able to log in using this e-mail address. A message will appear to tell the user that the e-mail is invalid and the user will have the chance to correct the e-mail and enter the correct one. The user can then click Submit and will receive further instructions on how to deal with the forgotten password.
3.4 Forgot Password – E-mail Correct

This is the screen that will be displayed to the user if the user has entered a valid e-mail address with no invalid characters. The user can proceed by clicking the Submit button, after which they will be sent an e-mail to the entered address. The e-mail will tell the user what steps to take next.
3.5  Forgot Password – Confirm E-mail

This is the screen that the user will see after clicking the Submit button after entering the valid e-mail. The message on the screen lets the user know that an e-mail was sent containing further instructions on how to reset their password.
3.6  Forgot Password – Confirmation E-mail

This is a screenshot of the e-mail that will be sent to the user in order to reset the password to their account. The e-mail will contain a link that the user can click on to follow. The link will bring them to another page with more instructions on what to do next.
This screen shows the next step the user must take in order to reset the password. The user will have to select a new password for their account and enter it in to the blank text box. The user will have to confirm the new password by re-entering it in the textbox below the first one. After doing so, the Complete button will become active and the user will be able to click to continue.
This is the screen that will appear to the user if the user has attempted to enter a new password or confirm the new password and has entered some kind of invalid character in the process. A message will appear at the bottom letting the user know an invalid character(s) has been entered and the user will be required to fix this before the Complete button will become active and allow the user to click it.
3.9  Forgot Password – Reset Passwords do not Match

This is the screen that the user will see if the new password and confirmation passwords do not match. The passwords must match in order for the user to continue the process so a message will appear at the bottom of the screen indicating to the user that the passwords are not the same. The user will have a chance to correct this and be sure both of the passwords match and then the Complete button will no longer be grayed out.
This screen will appear to the user if the user has entered a new password and confirmed that password and both passwords match. This means the fields will be complete for the forgot password section and the Complete button will no longer be grayed out. The user will be able to click Complete now and be able to access their account with the new password just created.
Once the user has entered passwords that match and clicked the **Complete** button, this screen will appear. This screen lets the user know that the fields have been completed and the password has been changed successfully. The user can now click the **Go to Login Page** button and be redirected to login to their account using the new password they just selected.
4  Self View Screens

4.1  Self View – Home Tab

This is the screen that the user will see when they are viewing their own information. This will be the HOME tab for the individual user. This tab will display the user’s top favorite groups and a description of each group underneath. There will be a Pick Favorites button for the user to select which groups they want displayed on their tab. The users’ wall will also be displayed, showing any posts left by friends.
4.2 Self View – Home Favorites

This is the screen that the user will see when they are selecting their favorite groups to be displayed on their HOME tab. The user will check a box next to the group that they want to be displayed and will then click Update when finished. The HOME tab will now display the selected groups. The user’s individual wall will also be displayed.
4.3 Self View - Profile Tab

This will be the screen that is displayed for the user’s PROFILE tab. This tab will show the user’s personal information that they enter to be displayed. The user can enter questions and answers, or pictures with captions. The questions can be anything the user wants and doesn’t necessarily have to be a question; it can be just be a statement as well. An Edit and Upload a Photo button will be available at the top to input more information. The user’s individual wall will also still be shown.
This is the screen that the user will see when they are editing their PROFILE tab. This allows the user to enter a question/statement and answer pair. The content can be anything the user wants as long as it is appropriate for the site. When the user is finished they can click the **Add** button so the info will be displayed on the site but until the info is entered, the **Add** button will be grayed out. Again, the user’s own wall will also be shown.
This is the screen that the user will see once they have filled in the proper info. After the user has entered a question or statement, and answer pair, the Add button will become active and the user will be able to click it to add the info to their PROFILE tab. The user can also choose to Upload a Photo by clicking the button at the top. The user’s wall will also still be displayed.
4.6 Self View – Upload Photo Blank

When a user decides to upload a photo to their PROFILE tab, this is the screen that will be displayed. The user can choose to Browse through files to find the proper link to the photo they want to add. There will be an empty box below for the user to enter a caption for the photo. Until the fields have been properly filled in, the Upload button will remain grayed out. The Edit button at the top will also allow the user to add another question/statement and answer pair. The user’s wall will also be displayed.
This is the screen that will be displayed once the user has entered all of the information to upload a photo to their PROFILE tab. The Upload button will now be active and the user can click it to add the picture. The user can also click the Edit button at the top to add another question/statement and answer pair. Also, the user’s wall will still be displayed.
4.8 Self View – Upload Photo Error

This is the screen that will be displayed if the user attempts to upload a photo that is greater than 2mb in size. The user will then have to attempt to upload a photo that is 2mb or less.
This is the screen that the user will see when they navigate to their own GROUP tab. This tab will display a list of all groups the user is a member of and which of the 6 R's the group pertains to. Only a few of the groups will be displayed for each of the 6 R's so a link will be available for the user to click to view all groups in that category. A section for groups that are not affiliated with any of the R's will be shown at the bottom. An A-Z listing will also be available for viewing groups. If the user wants to Browse for new groups they will be able to click the browse button at the top to view more. The user will also have the option to Create a Group by clicking the button at the top. Once again the user’s wall will also be displayed.
4.10  Self View – R View

If the user chooses to view all groups they are a member of in one of the R categories, this is the type of screen that will appear. The screen will show a listing of all groups in the chosen category. The user can also choose to view by the A-Z listing, or they can browse for other groups. If the user wants to create a new group, they will also have this option by clicking the Create Group button at the top. The user’s wall will also be displayed.
4.11 Self View – A-Z View

If the user chooses to view the groups by an A-Z listing by selecting a certain letter to view by, this is what the screen will look like. Say for example the user chooses the letter A, all groups they are a member of that begin with an A will be listed out. The user will also be able to Create a Group by clicking the appropriate buttons. The user’s wall will also be displayed.
4.12 Self View – Create Group Blank

This is the screen that the user will see if they decide to create a new group. The user will have to choose a group name, add a description and name a vice-moderator. By creating the group the user will automatically become moderator of the new group and will have full moderator privileges. The group will not be able to be created until all fields have been filled out. The user’s wall will also still be shown.
4.13 Self View – Create Group Full

This is the screen that will be displayed when the user has filled out all appropriate fields for creating a new group. The group’s name, description and a vice-moderator need to be filled in. To name a vice-moderator the group creator will have to enter the username/e-mail of the person they want to become the vice-moderator. Once these fields have been filled out, the Create button will become active and the user will be able to create their new group. The user’s wall will also still be displayed.
This is the screen that will appear if the user attempts to enter an invalid e-mail for the new vice-moderator. The user will be notified of the error by a message that will appear and the message will notify the user that they need to enter a correct e-mail. The user will have a chance to fix this and attempt to create the group again.
This is the screen that will appear for the user’s FRIENDS tab. The tab will display the user’s top friends and a little of the information displayed on that friends’ PROFILE tab. The user will also be able to view the rest of their friends by either viewing a list of all friends, or by viewing based on what the names starts with by using the A-Z index. To choose which friends to have displayed on this tab, the user can click the Pick Favorites button at the top and select their top friends.

The user’s wall will also still be displayed.
4.16 Self View – Favorite Friends

This is the screen that will allow the user to select their top favorite friends. The user will see a listing of their friends and be able to check a box next to the names of the friends they want shown on the FRIENDS tab. Once the user has chosen the top friends they can click the Update button to make the change. As usual, the user's wall will also be displayed.
If the user decides to view their friends by using the A-Z index, a listing of all friends names beginning with the chosen letter, will be shown. The user can look through the friends and navigate to their profile. They can also Pick Favorites for which friends will be shown on the FRIENDS tab. The user’s wall will also still be shown.
This is the screen that will be shown for the user’s MESSAGE CENTER tab. The message center will alert the user of any new notifications they have. These notifications include new friend requests and group membership confirmations or denials. If the user is a moderator of any groups, any new notifications of those particular groups will also be displayed in the user’s message center. The user’s wall will also be displayed.
This is the screen that will allow the user to choose privacy settings for their information. By default the user’s information will be made private. If they choose so, they can make their information public by selecting the public radio button and then clicking the Update button. Either all of their tabs are public or all are private. The user’s wall is also displayed on this page.
5 Group Member View Screens

5.1 Member Group – Home Tab

This is the screen for a Group’s Home Tab. A user will only see this screen if they are a member of this particular group. If the user is not a member, they will see a variation of this screen. This tab will display the top members of the group, and a little portion of the users profile tab below the name. The wall for this particular club will also be displayed on the right side. As a member of the group, the user will be able to post on the wall for this group and have others view their post.
5.2 Member Group – Profile Tab

This is the screen a user will see for the Profile Tab of a group. If the user is not a member of the group, they will see a slightly different variation of the page, otherwise this is the screen that will be shown. This tab will show some information about this particular group as well as any pictures and captions that have been added by other members. The wall for this group will also be displayed on the right and users will be able to post messages to this wall if they are a member.
This is the screen that will be shown for the Group’s Members Tab. A user who is not a member of this group will see a variation of this page. This tab will show a random selection of some members of this group. Below the name of the member, some information from the members profile will be displayed to give other users an idea of the type of people that join this particular group. Users will be able to view other members of the group as well by clicking the List All button at the top, or by clicking a specific letter also listed at the top, which will display all members of that group whose name begins with that letter. The wall for this group will also be shown on the right side and members of the group will be allowed to post messages on this wall.
When a user decides to view certain members of a particular group whose name starts with a certain letter, this is the screen that will be shown. For example, if the user decides to view all members whose name begins with the letter “A”, a listing like the one shown on this screen, will be shown. The user can scroll through the names and then choose another letter to view by if they want. The group’s wall will also be shown on the right and if the user is a member of this group, they will be able to post a message on the wall.
5.5 Member Group – Friends Tab

This is the screen that will be shown for the Group’s Friends Tab. If the user is not a member of this group, they will see a slightly different view of the screen. This tab will show the names of a random selection of other clubs that this particular group is friends with. A group can become friends with another group if they have something in common, are collaborating on a project, or simply if they want to have another friend. A short description of the group will be shown below each group name. Users can also view other groups that this group is friends with by using the List All button, or by clicking a specific letter at the top. The wall for this group will also be displayed on the right and members of the group will be able to post messages on it.
5.6 Member Group – A-Z Listing

If a user chooses to view other groups that the group is friends with, this is one of the possible screens that will be shown. For example if the user decides to view all groups with a name beginning with the letter “A”, a listing of all groups starting with that letter will be shown, like the above screen. The user will be able to scroll through all the different names. The wall for the group is also shown on the right and as a member of this group the user will be able to post messages on that wall.
6 Moderator View Screens

6.1 Moderator View – Home Tab

This is the screen that will be shown if the moderator of a group is viewing the Group’s Home Tab. This page will be similar to the standard view of the groups Home Tab except the moderator will have additional functionality. The tab will show some of the top members of the group and a short description of each member below their name. The difference for moderators is that the moderator will be able to choose which members will be displayed on this tab. The moderator can click the Pick Favorites button at the top and then select which members to have shown on the Home Tab. The moderator will also be able to post messages on the group’s wall, shown on the right, and they will also be able to delete messages posted by other users if the messages are deemed inappropriate for the site.
6.2 Moderator View – Favorite Members

When the moderator of a group decides to choose which members of the group should be displayed on the Home Tab, this is the screen that they will see. This screen will allow the moderator to look through the different members in the group, and check the box next to the users name if they should be displayed on the tab. When the moderator has finished choosing the members, they can click the **Update** button at the bottom of the page, and the Home Tab will be updated. The moderator can also post on the groups wall and delete messages posted by other users if they don’t want them shown on the site.
6.3 Moderator View – Profile Tab

This is the screen that will be shown to a moderator for the Group’s Profile Tab. This tab will display questions/statements and answers about the group, as well as pictures and captions that have been added already. As the moderator of a group, the moderator will have the privilege of adding more content to this tab or deleting content that is already there. The little x’s in the top corner of information allow the moderator to delete certain items. In order to add more content, the moderator can either click the Edit button or the Upload Photo button at the top. As always, the moderator can also post on the groups wall and delete content that is inappropriate.
When a moderator chooses to add more content to the group's Profile Tab, this is the screen they will see. The moderator will be able to add another question/statement and answer to be shown on the tab. Once the moderator has filled in this information, the Add button will become active and the moderator will be able to update the tab. The wall for the group will also be shown on the right and the moderator will be able to post messages as well as delete messages.
6.5 Moderator View – Edit Profile Tab Full

This is the screen that the moderator will see once they have completed the necessary fields needed to add additional information to the group's Profile Tab. The moderator will need to have added a question/statement and answer pair, and then will be able to click the Add button to update the tab. On the right, the group's wall will be displayed as well and the moderator will be able to post a message and delete messages posted by other users.
This is the screen that will be seen by the moderator if they choose to upload a new photo to the Groups Profile Tab. The moderator will be able to Browse through files on the computer for the correct path to the photo, and then the moderator will have to add a caption as well to go along with the picture. Once the moderator has completed these fields, the Upload button will become active and allow the moderator to update the tab. The moderator will also be able to post on the group’s wall, shown on the right, as well as delete certain posts left by other users.
6.7  Moderator View – Upload Photo Full

This is the screen that the moderator will see once they have completed all of the necessary fields for uploading another photo. The moderator will have to provide the correct path to the picture and then add a caption as well. Once this is done, the **Upload** button will be activated and the moderator will be able to click the button and update the Groups Profile Tab. The wall for the group will also be shown on the right and the moderator will be able to post on the wall as well as delete inappropriate posts left by other users.
This is the Members Tab for a group and this is the screen that will be seen by the moderator of the group. This screen will be very similar to the screen that will be seen by the standard user of the site. The tab will show a random selection of members of the group and a short description of each member below their name. The moderator will also be able to view other members by clicking the List All button or by clicking one of the letters at the top. Clicking on these will display another list of members of the particular group. The wall for the group will also be shown on the right and the moderator will be able to post on the wall as well as delete posts left by other users if the posts are not appropriate for the site.
6.9 Moderator View – A-Z Listing

If the moderator chooses to view more members of the group, this is one of the potential screens that could be shown. If for example, the moderator chooses to view all members whose name begins with the letter “A”, a listing will be shown of all members with a name beginning with this letter. The moderator can scroll through these names as well as search another letter or view all members. The wall for the group will also be shown on the right and the moderator can post messages on the wall or delete messages posted by other users.
6.10 Moderator View – Friends Tab

This is the screen that will be shown for a Groups Friends Tab. This tab will show the names of other groups that this particular group is friends with. A group can become friends with another group for any number of reasons including similar interests or activities, collaboration on a project, or just because. This view will be for the moderator of the group because the Pick Favorites button will be available. This button will allow the moderator to choose which of the other groups should be shown on the Friends Tab for other users to see. The moderator can also view other members of the group by clicking the List All button or clicking one of the letters at the top. If the moderator wishes to find more groups for this group to become friends with, this is possible by clicking the Browse button. The wall for the group will also be shown on the right and the moderator will be able to post messages as well as delete messages.
6.11  Moderator View – Favorite Friends

When a moderator decides to choose which groups should be displayed on the Groups Friends Tab, this is the screen that will be displayed. The moderator will be able to look through the list of friends of the group, and mark the checkbox next to the names of which groups should be shown. The moderator can click the Update button at the bottom when finished in order to update the tab. The wall for the group will also be shown on the right and the moderator will be able to post or delete posts from other users.
6.12 Moderator View – A-Z Listing

If a moderator chooses to view a listing of all groups that are friends with this particular group, this is an example of one of the screens that might be shown. The screen will show a listing of all groups whose name begins with the chosen letter. The moderator can change the favorites again that are displayed on the tab. The wall for the group will be shown on the right and the moderator can post messages here or delete messages left by other users.
6.13 Moderator View – Browse Groups/Users

This is the screen that a moderator will see if they choose to browse for new friends for the group. A listing of all groups on the site will be shown and the moderator will be able to click on the name of a group to navigate to the different tabs for that group. There is also an option to switch to browsing users rather than groups and this will function in the same way. To search for a specific group or user more easily, the moderator can click a specific letter at the top and view a different listing that way.
6.14 Moderator View – Message Center Tab

This is the screen that the moderator of a group will see as the Groups Message Center. This tab will display any new notifications for the group to the moderator so the notifications can be taken care of. Notifications can include things such as member requests as well as friend requests from other groups. If there is a new message for the group, the moderator will see a little symbol next to the **Msg Center** link towards the top. This symbol signifies a notification. The wall for the group is also still displayed on the right and the moderator can post messages or delete messages posted by other members.
7 Visiting User Screens

7.1 Visiting User – Home Tab

This is the screen that a visiting user will see when viewing another user’s HOME Tab. A visiting user is someone who is not friends with the user’s tab they are currently viewing. The visiting user will still be able to see the information, which will consist of the top groups this specific user is a member of, as long as the user has made their information public; however the visiting user will just have no available abilities while viewing the page. This means simply that they will not be able to post on this specific user’s wall because they are not friends.
7.2 Visiting User – Profile Tab

This is the screen that a visiting user will see when viewing another user’s PROFILE tab. Someone who is a visiting user is someone who is not friends with the user whose information they are looking at. For this reason, there will be a Request Friendship button at the top of this user’s tab so that if the visiting user chooses to do so, they can ask to become friends with this specific user. Since the two users are not friends, the visiting user will only be able to view the information, if the information is made public. The information will consist of any questions/statements and answers the user has posted, as well as any pictures and captions. The visiting user will not be able to post on this user’s wall because they are not friends, but they can still view the messages left by other users.
7.3 Visiting User – Private Profile Tab

This is the screen that a visiting user will see if they are attempting to view another user’s information that has been left private. A visiting user is someone who is not friends with the user’s tab they are attempting to view and if this specific user has chosen to leave their information private to non-friends, this is what the visiting user will see. Basically the only options they will have will be to click the Request Friendship button at the top. If the other user accepts this friendship request, then the visiting user will become friends with the user and be able to see their information.
7.4 Visiting User – Group Tab

This is the screen a visiting user will see if they are viewing the GROUP Tab of a user they are not currently friends with. The visiting user will still be able to see all groups that this specific user is a member of as well as be able to look through a list of all groups, or sort by a certain letter, but clicking one of the buttons at the top. The visiting user will also be able to see this user’s wall but they will not have the option to post on the wall without being friends.
This is the screen a visiting user will see when viewing the groups a specific user is a member of. In this particular listing, the groups are sorted based on one of the 6 R’s. Any group the user is a member of that falls under the specific R category will be listed here. Because this person is a visiting user, which means they are not friends with the user’s info they are viewing, the visiting user will not be able to post on the wall of this specific user. Other posts on the wall will still be visible, but the visiting user will have no functionality here.
This is the screen a visiting user will see if they are viewing groups of a specific user, categorized by a specific letter. A visiting user is a user that is not friends with the user they are viewing the information of. In this particular view, the visiting user will see a listing of all groups the other user is a member of, sorted by a specific letter, in this case the letter “A”. The visiting user will also be able to see the wall of the other user, and any messages that have been posted on this user’s wall, but the visiting user will not have the ability to actually post on this wall.
7.7 Visiting User – Friends Tab

This is the screen that a visiting user will see when viewing the FRIENDS Tab of another user. The fact that the user is a visiting user means that they are not friends with the user whose Friends Tab they are currently looking at. The visiting user will still be able to see a selection of the user’s top friends, if this specific user has chosen to make their information public, and the visiting user will be able to view different listings of all friends of the user as well. The wall for this specific user will also be viewable to the visiting user, but the visiting user will not be able to post on this wall unless they become friends with the user.
7.8 Visiting User – Group Home Tab

This is the screen that a user will see when viewing the HOME Tab for a group they are not currently a member of. The visiting user will still be able to see the information for this group, if the information has been made public, but the user will not be able to do anything on this tab. The top members of the group will still be viewable, as well as the wall for the group, but since the user is not a member, they will not have the availability to post on the wall.
7.9 Visiting User – Group Profile Tab

This is the screen a visiting user will see when viewing the PROFILE tab of a group they are not a member of. The information on this tab for the group will still be viewable, if it has been made public, but the user will not be able to do anything. The information available will be any questions/statements and answers posted by the group moderator, as well as any photos and captions. The group’s wall will also be visible but the user will not be able to post on this wall without being a member of the group. If the user decides they would like to become a member of this group, they can click the Request Membership button at the top to join. If they are accepted into the group, they will have additional functionality.
This is the view that a visiting user will have for a group that has chosen to keep their information private. The user is referred to as a visiting user because they are not a member of this specific group. The moderator for this group must have also chosen to keep the groups info private to non-members because the visiting user will not be able to see any of the information. If the user wants to become a member of this group though, they can click the Request Membership button at the top of the page. Upon becoming a member, the user will be able to see any of the information about the group.
This is the screen that a visiting user will see when viewing the MEMBERS Tab for a group they are not currently a member of. The visiting user will still be able to see some of the top members for this group, as well as view other members by using the List All feature of choosing a specific letter to sort by. The wall for the group will also be visible but the visiting user will not be able to post on this wall unless they are an actual member of the group.
7.12 Visiting User – Group Friends Tab

This is the screen that a visiting user will see when looking at the FRIENDS Tab of a group they are not a member of. The visiting user will be able to see a selection of other groups that this specific group is friends with. The user will also be able to view other friends of the group by using the List All button or choosing one of the letters above to sort by. The wall for the group will also be visible but the visiting user will not be able to post on this wall because they are not a current member of the group.
7.13 Visiting User – Group Friends A-Z Listing

This is the screen a visiting user will see if they have chosen to view the friends of a group sorted by a specific letter. In this case, the user has chosen the letter “A” to sort by and they will see a list of all groups that this specific group is friends with. The visiting user will also be able to see the wall for this group, but since they are a visiting user, meaning they are not an actual member of the group, they will not have the option of posting on the wall for this particular group.
8 General User Browse Views Screens

8.1 Browse Feature – Users

This is the screen that a user will see when browsing through other users or groups currently using the site. When browsing for users, the users will be listed in alphabetical order, starting with last name. This will work the same for groups. The user that is using this browse feature will have the option to view a complete list of all users on the site by clicking the List All button, or there can choose to browse users by a specific letter by clicking one of the letters at the top. The user can easily switch between browsing for users and browsing for groups by clicking the desired radio button at the top.
8.2 Browse Feature – Groups

This is the screen a user will see when browsing the site for groups. It will look very similar to the screen a user will see when browsing for users as well. The groups will be listed in alphabetical order. There will be an option for the user to browse a complete list of all groups on the site by clicking the List All button at the top, or the user can search by a specific letter as well. The user can easily switch back and forth between searching for users and searching for groups by clicking the appropriate radio button at the top.
9  Admin View Screens

9.1  Admin View – Group Profile Tab

This is the screen an administrator will see when looking at the PROFILE Tab for a group. It will be very similar to how the moderator of the group will see this tab, but there will be one significant difference. The things that will be the same will be that any questions/statements and answers, as well as pictures and captions that have been posted will be visible to both the administrator and moderator. Both of them will also be able to view the wall. The two will have the same privileges when it comes to deleting content as well; if something is not appropriate for the site, the administrator will have the ability to delete it from the tab; that is what the little x’s are for in the corner of each content area. The fundamental difference for the administrator viewing this screen is the button at the top called Tag Group. This button will allow the admin to label this specific group with one of the 6 R’s of Siena College. By labeling a group with one of the R’s, when a user joins this specific group, the group will be listed in their Group Tab under the R it is labeled with and will show other users how they are abiding by the R’s.
9.2 Admin View – Label Group

This is the screen that an admin will see when they decide to label a specific group with one of the 6 R’s. The admin will have clicked the button Tag Group at the top, and then they will be able to select which of the 6 R’s they wish to label the group with. The admin can label the group with one or more of the 6 R’s by clicking the Meets or Does Not Meet radio buttons next to the specific R.
This is the screen that an admin will see when viewing the PROFILE Tab of another user. The admin will see all content posted by that user, including any questions/statements and answers as well as pictures and captions. The user’s wall will also be visible to the admin and the admin will be able to post on this user’s wall. What sets the admin apart from any other user viewing another user’s Profile Tab is the fact that the admin can delete any content on this tab that is not appropriate for the site. Even though it is not their own profile information, if the admin decides to do so, they can click the little “x” in the corner of the content posted and remove it from the site so other user’s cannot see it.
9.4 Admin View – Group Listing

This is the screen an admin will see when viewing a listing of all groups on the site. The difference between an admin viewing a listing and a regular user viewing a listing is that the admin will have the ability to disable or enable certain groups. In the screen above, groups shown in gray have been disabled. Being disabled does not mean the group has been deleted, it just means the group isn’t available to other users right now. If the admin chooses to, at a later date, they can re-enable that specific group and have it available to other users again. To disable a group, the admin can just simply click the little “x” next to the group’s name and to re-enable the group the admin can just click the name of the group again. The admin can also browse the groups by a specific letter if they choose to do so, or they can view the complete list.
This is the screen an admin will see when viewing a listing of all users on the site. This will be very similar to how it will look when an admin is viewing a listing of all groups on the site. The users will be sorted in alphabetical order starting with the last name and the admin will be able to view a list of all users on the site by clicking the **List All** button, or they can view users by a specific letter by clicking the appropriate letter. The users whose names appear in gray have been disabled. These users have not been deleted but their accounts are not temporarily available. This is a privilege granted only to the admin; if a certain user wishes to disable their account, they can ask the admin to do this for them. The admin can do this by clicking the little "x" next to the users name and this will disable their account. If a user decides in the future they want their account reactivated, they can again ask the admin to do this for them and the admin will be able to re-enable that user.
10 Alumni Screens

10.1 Alumni View – Group Tab

This is the screen that an alumni will see when viewing their own GROUP Tab. This will be the same view a general user will have when viewing their Group Tab except for one main difference. Alumni will not have the ability to create new groups so therefore the Create Group button will not be available on an alumni’s Group Tab. Other than that, alumni will still be able to view their groups, sorted by the R’s or by a specific letter, as well as view their wall and any posts left by other users on their wall.
11 Guests Screens

11.1 Guest View – Group Profile Tab

This is the screen that a guest will see when viewing a Group’s PROFILE Tab. Guests will not have much functionality at all on the site because they won’t be an actual user on the site. When viewing information however, as long as the information is made public, guests will still be able to view all of it. On this screen for example the guest will still be able to see any questions/statements and answers as well as pictures and captions that have been posted for the group. The guest will be able to see the wall for the group as well but since they are not users or members of the group they will not be able to post on the wall. All the guest will be able to do is look.
11.2 Guest View – User Profile Tab

This is the screen a guest will see when viewing another user’s PROFILE Tab. Since the guest is not an actual user of the site, they will not have any functional abilities on the site. The guest will be able to see any questions/statements and answers as well as any pictures and captions that the user has posted. The guest will also be able to see the wall for this specific user but they will not be able to post on this wall because they are not friends with the user. Much the same as with viewing information for a group, all the user will be able to do with a user’s information, is view it.
12 Super Admin Screens

12.1 Super Admin View

This is the one and only screen that a super admin will see when they log in to the site. The super admin will only have one ability which is to change the status of a general user to an administrator or change the status of an administrator to a general user. The super admin will be able to view a list of all users on the site, listed in alphabetical order starting by last name, or they can view the users sorted by a specific letter. There will be radio buttons next to each user and if the super admin needs to change the status of the user, they can simply click the radio button for the desired status, and then click the Update button when finished.
