

Team Meeting Notes 6 12:30-1:00pm

3/9/2012

We have to the performance test April 12th so we have a month and a couple of days to get our system fully tested.

Need to look into having the code compiled successfully and then try it with multiple users.

ExoNET may not need 30 contestants and 10 judges if we have multiple browsers running on a single computer during the April 12th test. Although if we can avoid this than it would be helpful.

Icon or Logo can be placed on our system. Need to brainstorm ideas of where to put the logo or icon of ExoNET.
