Client Meeting #3

September 24, 2013

S.E. Lab / 9:30 – 10:30

Attendants: Karl Appel, Connor Blakely, Jacqueline Hausmann, Dr. Lim

Purpose: To Discuss, in more detail, the Hobb-IT project and any concerns/questions client had about Software Plan.

Notes:

- Any major concerns/questions of plan? Not immediately
- Our Resumes were fine
- Ability to scrape from browsers is not a constraint
- Lim asked if we had read further into the team docs – we had not
- It is possible that we might just use I.E. for html 5 – decision not made
- Requirement specs- IPAD 3 is clients device, IOS 7 will be on it shortly
- What is something client wants to see? He wants to be able to look up the price of any singular card immediately from websites
- System does not allow client to buy from our site
- 3rd non login user possible – just to look up card prices
    - Maybe a "captcha"

Next Client meeting either Tuesday 9:30 to 10:30 or Thursday 5:45 to 6:30 - TBA
