Team Meeting
4/23/14
Software Engineering Lab
Everyone Was Present and On Time Except Jackie
6:45 - 8:00 PM

- Talked about what we had been working on for the software
    - Connor:
        - went over the administrator functionality
        - most of it is done and looks good
        - need to make sure that if admin makes changes to scraper, then that new code can compile and be used to scrape
    - Karl:
        - talked about the functionality with some of the scrapers
        - writes to the database
    - Bryan:
        - went over some of the scrapers and the necessary changes to fit with the php calls that Karl has made
- Added a couple additional fields to the database to make for easier queries from the system
- Continue to work on the software so we can finalize the document for Monday
