MAJIK Software Solutions
Client Meeting #4   October 10, 2006   4:00-5:00pm

Agenda
- Show use case diagrams to clients, get feedback.

Feedback
- Search fields should be limited for the user (but not the admin).
- When a device is clicked on, could display a tree of information:
  - ➢ Hardware
  - ➢ Software
  - ➢ ID
    - ^ Asset Tag
    - ^ IP Address
- On the opening page, tell each user what they can do, a menu of options.
- Discuss a place to define a list of permissions for a group of users, for example a department.

For Next Week
- Clients request a list of capabilities by user: what the admin and user should be able to do in the application.

Miscellaneous
- Discuss switching meeting times next week so that other team members can attend client meetings.
