

## **Agenda**

Discuss visual components and requirements for a prototype.

### **Welcome Page**

- first page viewed is a welcome page with a description of what the program does, our team logo, and a login.
- Login includes the username and password, and there will be just one login for both users and administrators to use.
- The username will be a dropdown menu to choose either 'user' or 'admin'.
- Multiple limited users, but no "guest" users- no one can see any part of the app without logging in.
- No client contact info on this page.

### **Admin View**

- Simultaneous logins of admin account possible, with full privileges and a password assigned by our clients (which they can change in the future).
- Once logged in, the next page contains a menu to choose what to do:
  - Roger Bacon
    - first floor
    - second floor
    - third floor
    - fourth floor
  - Morrell Science Center
    - first floor
    - second floor
    - third floor
    - fourth floor
- Click on the floor and its floor diagram appears, then able to click on the room to zoom in.
- Icons in each room indicate different devices.
- A constant drop-down menu on each floor plan page – lists other floors, to switch to another floor without going back.

### **User View**

- First page to load is a description of user privileges.
- User password could be their name, so that faculty will remember it.
- Access to info in the system could be limited to their facilities and those of their department.

### **For Next Week**

- The clients request a list of questions that members of the faculty may have, what they may want to do with this our product, etc.
