

## **Agenda**

- Search Function
  - A link will be included on each page to a separate search page.
  - Search parameters should include most fields on the form:
  - The results will display in a summary line with links to the details in the page.
- Control Panel
  - Features will include:
    - Users* –select user from a dropdown menu to delete.
      - type new username into input box to add users.
    - Permissions*
      - select a user from a dropdown menu,
        - do a mini search on the device, then change the permissions.
    - Room Notes* – comments
    - Devices* – add/delete wallboxes
      - via coordinates to indicate where in the room they are located.

\*NetReg – the system that is currently used to register existing devices on the networks in the science buildings.
