MAJIK Software Solutions
Team Meeting   March 7, 2007

Agenda
Address questions and changes brought up during the Detailed Design presentation and
resolved in our Client Meeting.

Menus
- Floor menu in the upper left corner will be updated per the client's request to
  default as a dash and add a submit button.

Admin Control Panel
- Under the Permissions section of the Control Panel, text will be added to state
  the default permissions for a new user (that they have no permissions,
  prompting the administrator to assign them).

Unit Tests
- Unit Test 1.4 will be updated to reflect that when a user types in a username,
  this username will not be verified until they enter a password and click
  'submit'.
- Change terms "login" to "username" in database tables
- Updates needed to the Relationship Diagram – need symbols that indicate the
  type of relationship between entities.

Next Week
Changes will be made and reviewed with our clients in our meeting Wednesday at
12:30pm.
