Client Meeting Notes - 9/17/2014

------------------------

Discussed Possible Project Names (need work)

- SATA - Siena Alumni Tracking Application
- CS-ACTIONS - Computer Science Alumni Connecting Through the Innovative Open Network System
- ACT the PART - Alumni Connecting Through/To the …..

Possibly have two maps

1. High School/Hometown
2. Where they are now

Priorities of the System:

- Clean, short form that takes minimal time to fill out -- maybe auto fill some dependin on how connect.
    o Will test this on some test groups to find optimal form
- Reach out to maximum number of alumni
    o Possible to create Linkedin Siena CS page and send mass Facebook messages asking to join

Possible to connect to Siena CS current page and rotate profiles (possibly hourly) on that page

Idea for final presentation of the output - have someone connect live (faculty alumni?)

Screening process:

- If screen data before post: between screen showing basic info so user knows works
- If not: Post and have flag option
