Client Meeting Notes -10/14/2014

Main Objective – Data Flow Diagrams

Approval Process for accounts
- Open registration for users
- Profile hidden until admin approves

Admin Account
- One Admin
- Notification section
- Possible email alerts?

When log in:
- See new registered alumni
- Approve/deny display to public
- Broadcast messages to all alumni (email)
- Hide profiles

Profiles can be
- Public
- Private/Hidden from public but not from user
- Marked as deleted/lazy delete – hidden from user and public but admin still has access

Look at Linkedin API and create a mini app to see if integration possible

Map will most likely require Google Maps – talk to Dr. Yoder about this.

Should session or outreach be shown in the diagram?
