

Client Meeting Meeting Number 11
January 22, 2015

- System with flexibility to change evaluation formula
- Dr. Eddy would like to be able to pick questions from a repository/database in order to create different types of evaluations for professors
- Instructor will determine total number of questions
- Point system for characteristics $M = 1$ $E = 1$ $D = -1$
- Algorithm for calculating overall score:

$$(100\% - (M + E)) + (D*-1) + (M*-1) + (E*-1) = x/100$$

$$x/100 = y$$

$$y * \text{total \# of questions} = z$$

$$z/\text{total \# of questions} = \text{final \%}$$

- Dr. Eddy has a presentation on March 20th and would like to be able to show something such as the web application navigating to the team evaluation software
