Team Meeting #12
Preliminary Design Preliminary Meeting

Members Present: 5/5
Colin Cubinski
Daniel Nakhla
Matthew Restivo
James Rocco
Justin Valentini

Date: November 6th, 2006
Start Time: 7:00PM
Location: Roger Bacon Computer Lab

This meeting was held to review older preliminary designs and decide who on the team would do which part of the document. A due date of November 17th was set so that there would be sufficient time to review the document, meet with our clients, and make any necessary changes. During the next class session we will be given time to further review the document and decide which portions will require the most work. Sufficient time was also spent reviewing the data flow portion of the previous document and considering what changes need to be made for the next document in consideration of the errors that were discovered taking into account the data dictionary.

End Time: 8:30PM
