

Environmental Monitoring System

Software Plan

by

SaintSoft

Welcome

Mr. Kenneth Swarner

Systems Administrator

Computer Science Dept.

Siena College

&

Dr. Timoth Lederman

Professor of Computer Science

Siena College

SaintSoft Team Organization

- Daniel Schuldt - *Team Leader*
- David Moore - *Systems Administrator*
- Christian Damberg - *Webmaster*
- Hannah Palmer - *Librarian*
- Luba Mikhailova - *Design Consultant*
- Tina Ting - *Software Developer*

Agenda

- Introduction and Conclusion
by Daniel Schuldt
- Problem Definition and Project Plan
by David Moore
- Development Schedule
by Christian Damberg

Problem Definition

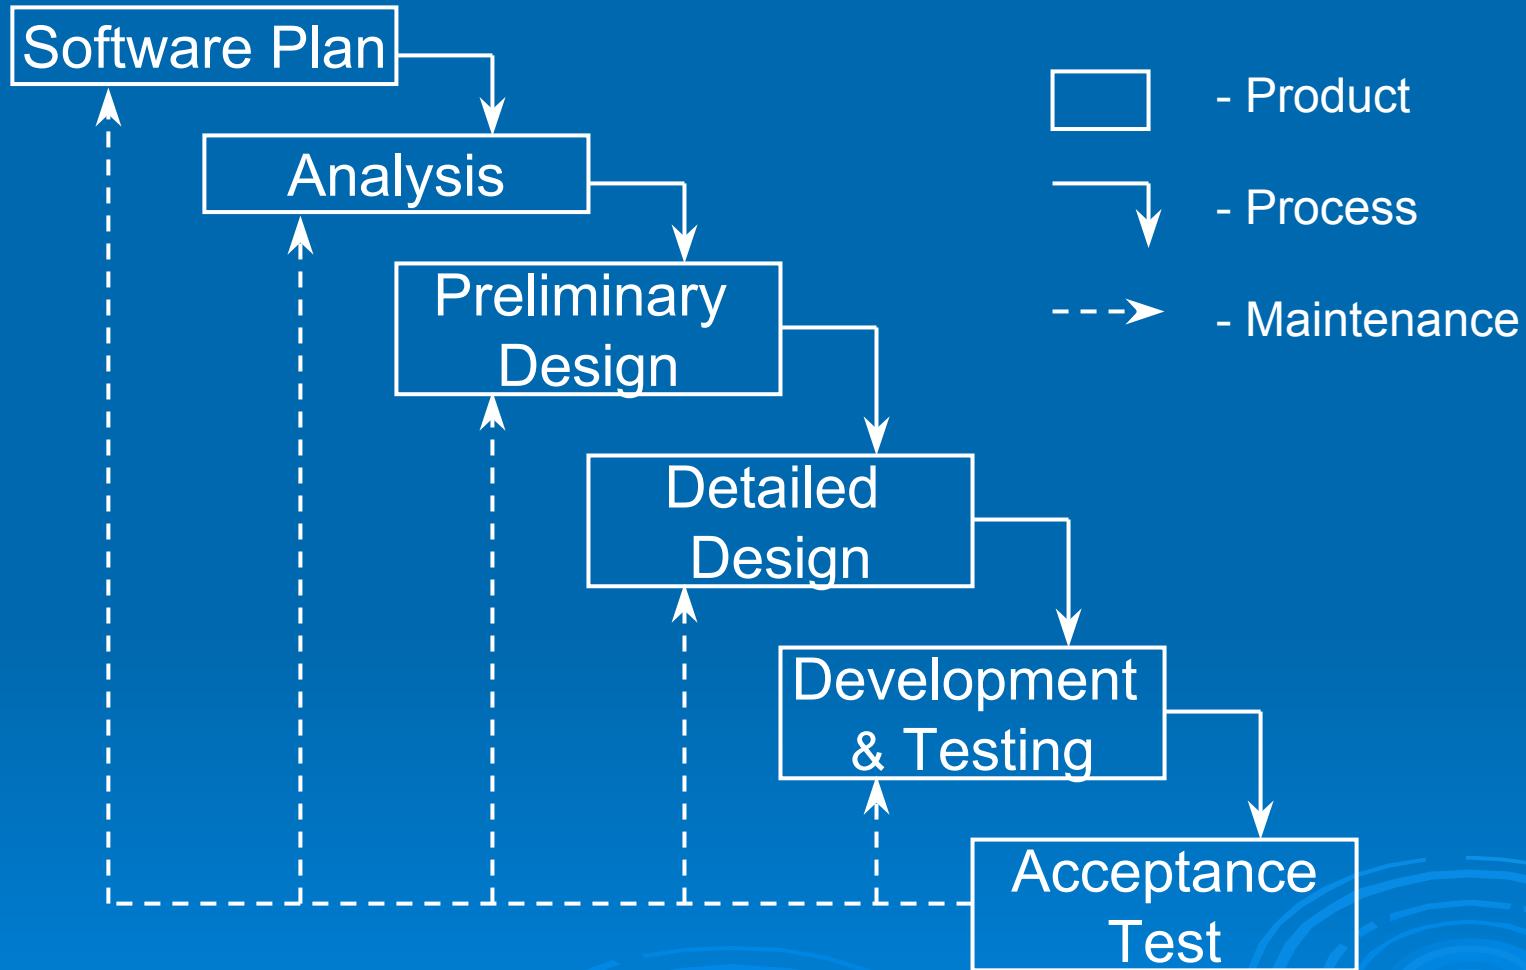

Remotely view status of sensors through a web browser

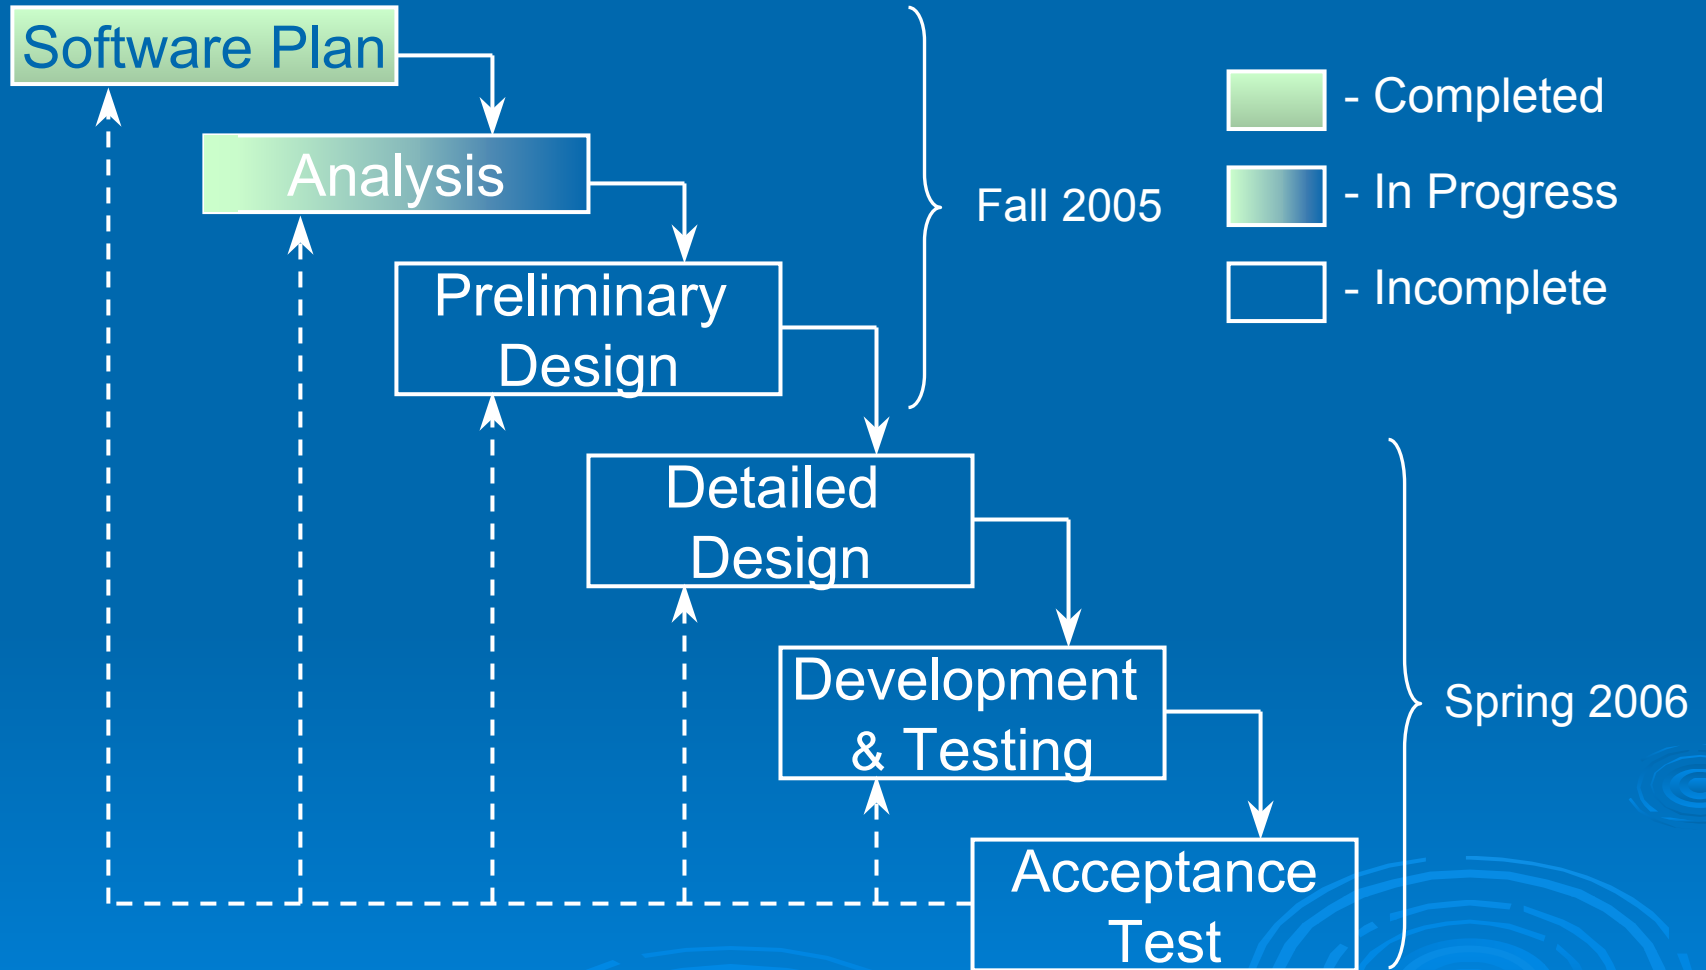

Linux server running apache

Motion sensors and video cameras monitor the temperature and water levels

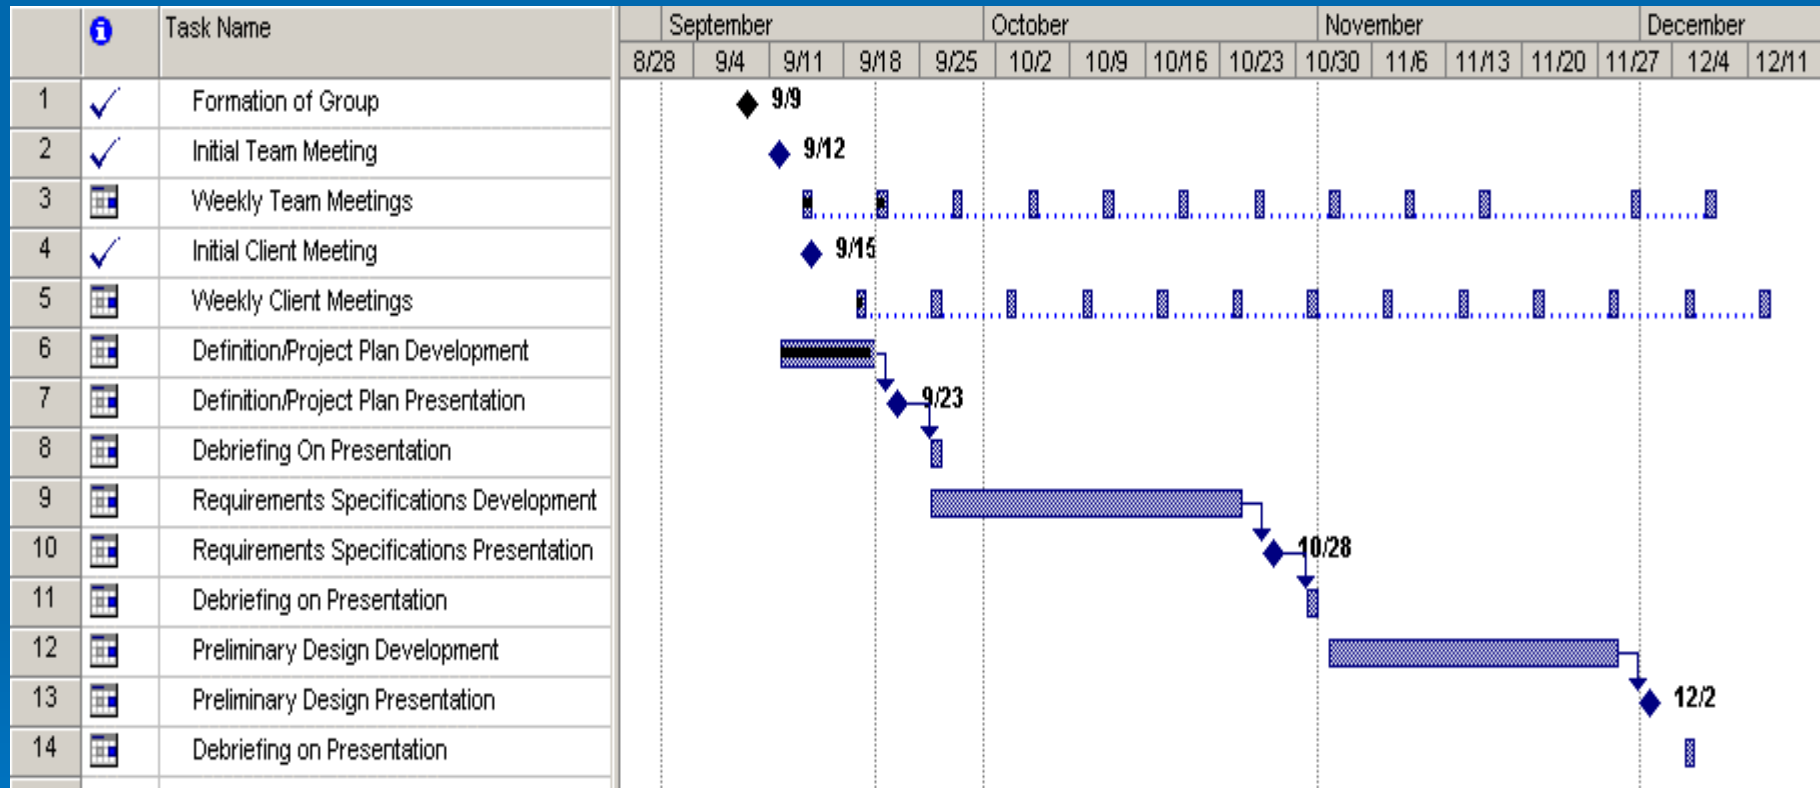

Linear Sequential Model

Project Plan

Development Schedule

Supporting Documents

- Software Requirements Specifications
 - Documentation: October 24, 2005
 - Presentation: October 28, 2005

- Preliminary Design
 - Documentation: November 28, 2005
 - Presentation: December 2, 2005

Supporting Documents, cont.

- Detailed Design
 - Documentation: Spring 2006
- Acceptance Test
 - Documentation: Spring 2006

Summary

- What's Next?
 - Comprehensive Understanding of Problem

Any Questions?

Thank you !

We look forward to working with you on this year-long project to get this software working.
