Client Meeting 2/18/2013
Brett, Tyler, Kelly

Start 10:25

Can resubmit submissions just have a different submission number.
Can leave old submission in database
       For example, submission 7 could resubmit and be submission 28
Or we can have database replace old submission, so last submissions "wins"
Problems could be if change title – need to keep filename the same
Think about resubmission and how it will look interface wise

Have form for reviewing submissions

Configure unit test
- Client is okay with having another directory for configure unit tests

End time 10:40
